Coming September 2026: My Ride K-12 Transportation App

We are excited to announce that our district will soon be launching My Ride K-12, a new transportation app that will help families stay connected to their student's bus service.

With My Ride K-12, parents and guardians will be able to:

- View their student's bus route and transportation information.
- Receive text notifications when buses are running late or when important transportation updates are available.
- Track their student's bus location in real time, where available.

My Ride K-12 is designed to improve communication between the Transportation Department and families by providing timely updates and greater visibility into daily bus service. Whether you're checking route information or monitoring your student's bus on its way to and from school, the app offers a convenient way to stay informed.

We look forward to bringing this new resource to our families and enhancing the transportation experience for everyone.
