Demo entire deck. Install Helical Pile support footings, we are planning to install 8 new deck supports. Build a 539 square foot deck space. The deck will be built with 2x10 framing built 16"o.c. with triple 2x10 beams and 6x6 support posts. Ledger connection will be installed 10"o.c. staggered up and down the span across ledger board with 2 stacked top and bottom on each end. Joist hangers at ledger board to joist connection and hurricane ties at beam to joist connection for up-lift requirements. Will flash at the house connection to the ledger board. Blocking across the middle of deck framing between beam and ledger as well as over the beam for stiffness and racking of joists. Install flashing tape to the top of all framing for joists, beams and stair framing to ensure longevity of the deck frame. Build two sets of stairs approximately 4'10" wide measuring from outside edge of the stair tread decking and one 6.5' stair and step down in front of door. The stair framing will land on a new concrete pad for proper level and support design to meet IRC section R403.1.4.1 requires 12" frost protection at the base of the stairs.

See attached scope of work for details regarding replacing the deck.

Existing tile shower to new tub with tile walls. New subfloor, tiled floor, vanity and toilet. Position of plumbing fixtures stays the same. No electrical changes.

Remove and dispose of the existing roofing system and replace approximately 23.4 squares of roofing with new architectural asphalt shingles. Install new underlayment, ice and water barrier, seam tape, drip edge, flashing, ridge vent, and all required roofing accessories in accordance with manufacturer specifications and local building codes.

Strip of existing siding 22sq .Install 1" insulation .Install new vinyl siding.Replace front door and back sliding door

				We will saw cut and remove the stained concrete where the (2) previously removed oil tanks were. We will excavate and take a soil sample directly beneath the affected area for both tank locations. We will backfill the excavated areas with clean material. Once soil sample results are returned (as long as clean results) we will return to replace the concrete floor where removed to access soil.

								Applicant	Thomas Minicucci, Address:19 Baker Road, Phone:(860) 886-3194	
		Rebuild chimney from the roofline up. Install smooth wall stainless steel liner within existing 12" flue liner. The existing boiler has a 12" smoke pipe entering the chimney from its days as a coal burning appliance. The boiler was since converted to natural gas with a 5/16" orifice and has a max input of 275,000 BTU/hr. With a height of 39' we calculate that an 8" liner will be sufficient air volume to vent this appliance.
