July 30, 2026

Dear Parents/Guardians,

Iroquois High School is pleased to offer an Earth and Space Science Regents Review Program for students who will be retaking the August Regents Examination. We strongly encourage your student to participate in this review opportunity, as it is designed to reinforce essential course content and help students feel confident and prepared on exam day.

The review sessions will be held on **Monday, August 17, 2026, and Tuesday, August 18, 2026, from 1:00 p.m. to 4:00 p.m. each day**. Sessions will take place at **Iroquois High School in Rooms 114 and 117**. During the review, students will revisit key Earth and Space Science concepts, practice effective test-taking strategies, and work through cluster questions from previous Regents examinations. These activities are intended to strengthen students' understanding of the material while providing valuable experience with the format and expectations of the Regents exam.

Students should bring a writing utensil to each review session. All other review materials will be provided.

We encourage all students who are retaking the Earth and Space Science Regents Examination to take advantage of this opportunity. Regular attendance at both review sessions will provide students with additional support as they prepare for the August examination.

If you have any questions regarding the review program, please contact the Iroquois High School Main Office or Kimberly Ferguson in the Science Department (kferguson@iroquoiscsd.org). We look forward to working with your student and wish them the very best as they prepare for the Regents Examination.

Sincerely,

Iroquois High School

Science Department
