Ceramics

Fall	ARCE 1A ** Ceramic Handbuilding I (3 units)	This course offers an introduction to ceramics materials, concepts, and processes. It includes basic design principles, creative development and problem solving, hand-building, glazing and finishing techniques, firing, throwing, and ceramic terminology. Development of clay objects, examining historical, contemporary, and personal modes of expression across cultures, is studied.
Spring	ARCE 1B ** Ceramic Handbuilding II (3 units)	This course is a continuation of ARCE 1A, including handbuilding techniques, experimentation with clay bodies, glazing, and finishing processes.

Graphic Arts

Fall	ARTG 11 ** Introduction to Photoshop (4 units)	This course is an introduction to digital imaging with Adobe Photoshop software, the industry standard for digital imaging, electronic photo retouching, illustration, and web content creation. Students learn to create, scan, and manipulate images for graphic and fine arts in an Apple computer environment.
Spring	ARTG 10 * Introduction to Computers for Graphic Arts (4 units)	This course provides students with essential computer hardware and software skills in the graphic arts field. Students learn about the desktop computer environment, operating systems, and graphic design computer terms and principles. Topics include creating vector artwork and bitmap images with Adobe Illustrator software. Students are introduced to color on the computer, scanning, file formats, and other concepts related to the commercial design industry.

History

Fall	HIST C1001 ** United States History to 1877 (3 units)	This course offers a historical survey of the European colonization of North America and ideals in the United States from pre-colonial times through Reconstruction. It presents ethnic, physical, economic, social, and cultural influences on the development of the United States from a variety of points of view. Satisfies CSU American History requirement
Spring	HIST C1002 ** United States History from 1865	This course offers a historical survey of the United States from the end of the Civil War to the present. The course themes include America's rise to global power, changing ideas of freedom following the Civil War, and the creation of new boundaries of the nation and its citizens.

Business

Fall	BUSI 20 ** Introduction to Business (3 units)	This course offers a multidisciplinary examination of how culture, society, economic systems, legal, international, political, financial institutions, and human behavior interact to affect a business organization's policy and practices within the U.S. and a global society. Fundamentals of management theory, marketing practices, business ethics, human resources, quality management, financial markets, and entrepreneurship are covered along with career exploration and opportunities in each field.
Spring	BUSI 50 * Introduction to Marketing (3 units)	This course introduces strategic marketing and the marketing environment, including emphasis on customer-centric marketing and technology. Actionable tools such as marketing research and target marketing are learned through study and application. Core decision-making is covered, from product research and development in goods and services to pricing options, promotion alternatives, and distribution choices.

Theater

Fall	THEA 19 ** Stagecraft (3 units)	This course is an introduction to technical theatre and the creation of scenic elements. It includes basic concepts of design, painting techniques, set construction, set movement, prop construction, backstage organization, and career possibilities. It may include stage management, lighting, and/or sound techniques. It also includes lecture, reading, projects, and practical experience.
Spring	THEA 21A ** Theatre Workshop I (3 units)	This course is an introduction to technical theatre and the creation of scenic elements. It includes basic concepts of design, painting techniques, set construction, set movement, prop construction, backstage organization, and career possibilities. It may include stage management, lighting, and/or sound techniques. It also includes lecture, reading, projects, and practical experience.

Kinesiology

Fall	Non-Dual Enrollment Course	N/A
Spring	KINS 41 ** Prevention and Care of Athletic Injuries (3 units)	This course introduces students to modern athletic training principles. It covers procedures and techniques for prevention, recognition, treatment, and rehabilitation of athletic injuries.

Mathematics

Fall	Non-Dual Enrollment Course	N/A
Spring	STAT C1000 ** Elementary Statistics (4 units)	This course covers the use of probability techniques, hypothesis testing, and predictive techniques to facilitate decision-making. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-square and t-tests; and application of technology for statistical analysis, including the interpretation of the relevance of the statistical findings. It covers applications using data from disciplines including business, social sciences, psychology, life science, health science, and education. This course also contains a computer component. Calculations are done with the aid of a desktop computer or with a handheld calculator/computer having built-in functions.
