

Overbrook Chinese Language Program

Don't let your child miss this great learning opportunity.

“Learning”

Classes begin August 27th, 2026.

Learning a foreign language will help your child in many ways. Not only is it easier to learn a foreign language at a younger age, but it also helps increase progress in academics, as well as creative thinking skills. Research shows that children who have studied a foreign language in elementary school achieve higher scores on standardized tests in reading, language arts, and mathematics than those who have not. In addition to testing, learning a foreign language helps to increase a child's listening ability, memory, creativity, and critical thinking - all of which are thinking processes that increase learning in general.

Mandarin is one of the oldest languages in the world and is the most commonly spoken form of the Chinese languages. It is the official spoken language of the People's Republic of China, the Republic of China in Taiwan, Malaysia, and Singapore. Mandarin is also one of the six official languages of the United Nations. It is the single most commonly spoken language on the planet.
