You're Safe with Us

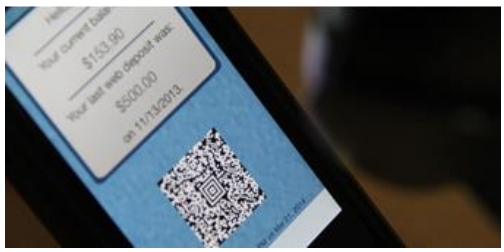

Security is a top priority at Odin. We're PCI/DSS compliant and we use SSL certificate encryption to protect your data across every transaction.

MyKidsSpending.com Web Portal

Why MyKidsSpending (MKS)?

It's a challenge to keep track of all the expenses related to your child's education. They need books, supplies, meals and snacks just to get through each day. Not to mention all the fundraisers, field trips and activities you'd never let them miss out on. But sending them to school with checks or cash is worrisome because you fear they may accidentally drop and lose their money or forget it at home and be without the funds the need for an event or lunch.

MKS centralizes incidental spending in one online location, so you can always be certain your child has access to the funds they need for all incidental spending.

Know your balance fast with the MKS Mobile App! Students use it to make purchases!!

What can it do?

MKS gives you the ability to view spending history online or request a detailed statement of spending be emailed to you, at your convenience. You'll be able to set a low balance level at which to automatically receive a statement with the option to have the account automatically replenish itself from your checking account. It will keep you informed about spending and offer financial peace of mind.

MKS is easy to use too! Simply apply for an account on the MKS website using your child's school and ID number. Once confirmed, we link your web account to their debit account, that's it, you're in business. From your account, you'll have the option to make deposits using your checking account (ACH transfer) or credit card. Deposits typically become available for your child to spend within 10 minutes, so you'll never have to worry about forgotten checks or cash ever again!

If you want to simplify how you manage educational expenses, contact your school and ask about MKS!
