HOUSEHOLD is defined as all people, including parents, children, grandparents, and all people related or unrelated who live in your home and share living expenses. If you are applying for a household with a foster child, you may include the foster child in the total household size.

HOUSEHOLD INCOME is considered to be any taxable income each household member received before taxes. This includes wages, social security, pension, unemployment, welfare, child support, alimony, and any other cash income. If including a foster child as part of the household, you must also include the foster child's personal income. Do not count foster payments as income.
