

Seojun “Tommy” Park, Class of 2026

“Compared to other boarding schools I know, MCI has more opportunities for students, especially those planning on going to high-ranking universities.”

MCI offers lots of AP classes, the SAT test is offered right here on campus, and those are some of the reasons I was able to get into the university that I wanted to. No matter what your background is, coming to MCI from another country allows you to meet students from all over the world. If I hadn't have met my friends here, I would have never know what the culture of Tanzania or Montenegro is like, and I think that's really exciting.

MCI School: School of Engineering and Technology

Favorite Accomplishment: Scoring 5's on Calculus and Physics AP Tests

Next Chapter: University of Washington, Majoring in Material Science & Engineering

“Everyone is close to each other, you don't feel any disconnection across campus, and I think those are reasons why you should come here.”
