

HHB Service Types:

Intermittent:

- A student who is absent from school sporadically due to a chronic condition (ex: severe asthma attacks, diabetic episode, periodic anxiety, depression).
- The parent may have to provide a doctor's note to Student Services from the same doctor who requested the HHB services for absences to confirm the absence was due to the HHB diagnosis.
- An absence for any other reason will not be counted or coded as HHB.
- Students on Intermittent HHB are still subject to RCSS Attendance Policies on record.

Full-Time

- Students who have a medically diagnosed physical or psychiatric condition, which confines the student to a hospital or their home {bed} and restricts all activities for nine weeks or less, but for a minimum of ten school days (ex: broken leg, surgical procedure).

Long-Term:

- Students who have a medically diagnosed chronic health condition which may cause the student to be absent from school for more than nine consecutive weeks per year (e.g., transplant patients, students receiving chemotherapy, radiation, dialysis, or other therapy that significantly affects the student's ability to attend school).

For services longer than 12 weeks, updated medical information must be provided to Student Services every 12 weeks for services to continue.
