

Kassie Tsai, Class of 2026

"MCI is not like every American school, it's really an international school where you learn cultures from around the world and new things you carry wherever you go."

When I first got here, I heard that there were so many trees and nature and there was snow in the winter, so that really excited me. Now that I'm here, I realize that it's not just friends that I've met from around the world, it's a new family. We all live together and we are so close, it's just a really nice feeling in the dorms. On weekends we have activities off campus where we can go to the movies, ice skating or skiing, things like that which are just fun.

I have a business class that is so fun, the teacher didn't start just with the book, she showed us how to build a business and a there's a chance to visit Harvard and explore that, it's just really exciting and there are so many opportunities here.

Favorite Sport/Club: Cheering
Favorite Memory: Cooking with Friends in the Dorm
Favorite Class: Business and Marketing
