

STUDENT SUCCESS SKILLS

Student Success Skills are a set of standards that will be taught in all schools, to all students, by all teachers throughout the school year. These standards include six skills that are broken down into several standards across grade levels. Teaching these skills will support students in creating a foundation for managing emotions, healthy relationships, understanding and empathizing with others, being responsible and safe, and learning to cope with difficult life situations.

RETHINK ED

ReThink Ed is the comprehensive K-12 online platform that will be used to provide teachers access to instructional materials, lessons, and activities. Various instructional strategies will be used by teachers to teach students skills, allow them to practice and apply the skills learned. Each skill also has an Academic Connection which links each skill to academic content.

THE RESEARCH

Interventions focused on key skills can lead to increased academic performance, improved classroom behavior, increased ability to manage stress and depression, and better attitudes about self, others and school. The positive impact of this work are long term and far reaching. These skills can help reduce poverty, improve economic mobility, and improve life outcomes (CASEL 2020).

ReThink Ed STUDENT INVENTORY

The ReThink Ed Inventory is used to measure student growth across Student Success Skill standards taught by teachers. Students complete the inventory by indicating if they almost always, always, sometimes, or never apply the skills being taught in the areas of Self-Awareness, Self-Management, Social Competence, Collaborative Problem Solving, Reflective Learning Strategies, and Sense of Belonging. The ReThink Ed Inventory includes approximately 15-20 items and is administered to students in the Fall and Spring. It takes approximately 15 minutes to complete. Students will complete the ReThink Ed Inventory using the ReThink Ed platform.
