

SUPPORT FOR EVERY STUDENT. EVERY DAY.

98%

of graduates are
accepted to a
four-year college.

At Hyde, support isn't reserved for students who are struggling. It's woven into daily life, because you don't grow into your best self alone. Even the strongest students are stronger with the right structures around them.

Hyde School is a coeducational boarding and day school in Bath, Maine, offering grades 9 through 12 and a postgraduate year.

Community Discovery Groups

Every student meets weekly in a faculty-led small group: a space for reflection, accountability, and real peer connection.

On-Campus Health Center

Students have walk-in access to the Health Center five days a week, with a clinical team on campus and a nurse on call during evenings and weekends. This provides every student with a clear path to care.

Learning Connections

Hyde's academic support program. Faculty attend classes with students as needed, and students receive focused skill development sessions during the school day. Learning Connections is optional and carries an additional fee.

Family Partnership

A Hyde signature since the 1970s. Families are considered full participants in the Hyde experience, not just observers. Families do their own growth work alongside their students, because their home is part of the classroom.

Counseling & Clinical Support

Every student has access to a full-time clinical team. Students may refer themselves, and families or faculty may also make a referral. A psychiatric nurse practitioner is available weekly, and off-campus and telehealth services are coordinated as needed.

College & Future Counseling

Every student works with an experienced college counselor. Seniors and postgraduates have a dedicated college counseling class built into their schedules, giving them the time and structure this process deserves.

Additional Support, When It's Needed

Hyde maintains trusted partnerships for targeted health and wellness support, including specialized counseling and medication management. These services are billed directly by the outside provider, and many are covered by insurance. Families do not navigate these needs alone, and clinicians and consultants are welcome to call us directly.

Develop Character To Discover Unique Potential.

Mindfulness, personal strengths, and resilience aren't stand-alone programs at Hyde. They're part of the conversation every day.
