

Field Trip Self-Transport Guidelines

The following guidelines have been reviewed and approved to provide High School Principals parameters in determining if a student may self-transport to a field trip. If the school provides transportation, all participants must travel with the school.

In order for a student to self-transport:

- The destination of the trip must be less than 40 miles, one way, from the school.
- Written parent permission is required for each field trip when a student is providing their own transportation or riding with their parent/guardian.
- **There must be less than 20 students attending the field trip.**
- **If one student is unable to provide his or her transportation, the school must provide transportation.**

***Under no circumstances will students be allowed to carpool when providing their own transportation to a school sponsored field trip.**
