

Wellness Services Lab Tests

B12 ... $48
Used to assess Vitamin B12 and/or Folate deficiency, which could be due to anemia, malabsorption, or malnutrition.

Blood Typing ... $18
Discover what blood type you have.

Complete Blood Count ... $38.50
Includes red and white blood cell count, platelets, hematocrit, and overall screening for infection and anemia.

Comprehensive Metabolic Panel ... $25
Includes screening of your electrolytes, glucose, kidney and liver function, lipid panel (cholesterol) and heart function.

Cardiac CRP ... $44
High sensitivity C-reactive protein testing can be helpful in assessing the risk of heart attack and stroke. This sensitive test measures the presence of inflammation in the body.

Glucose ... $13
Test your fasting blood sugar value.

Homocysteine ... $49.50
Helpful in assessing the risk of heart attack, stroke, and dementia. It can also be used to determine Vitamin B12 deficiency and may be elevated in diseases of the kidneys, thyroid, bowel, or alcoholism.

Hemoglobin A1C & Lipid ... $40
Hemoglobin A1C is used to monitor glucose control and gives a picture of the average amount of glucose in the blood over the past few months. Lipid measures total cholesterol, high density lipoprotein, low density lipoprotein and triglycerides to assess risk of cardiovascular disease.

Note: Payments (credit card or check) are collected at time of service.

Iron Level ... $18
Used to test how much iron is stored in your body. Iron is an important mineral that the body needs to produce red blood cells.

Prostate Specific Antigen ... $38.50
Recommended for men 50 years of age and older, unless there is a positive family history. PSA is a protein that the male prostate gland produces. Elevated levels may be seen in men with prostate cancer or in prostate enlargement.

Vitamin D ... $50
Vitamin D is vital for the growth and health of bone, as well as the regulation of the immune system, metabolic function, and cancer prevention.

T3 Free ... $35
The T3 test is usually ordered as a follow-up to an abnormal Thyroid Stimulating Hormone test.

Free T4 ... $33
Individuals who have hyperthyroidism will have an elevated FT3, whereas those with hypothyroidism will have a low level of T4. This test helps to distinguish between different causes of hyperthyroidism and hypothyroidism.

Testosterone Total ... $50
Testosterone testing is used to diagnose several conditions in men, women, and boys. These include early or delayed puberty, infertility, decreased sex drive, testicular tumors, and pituitary disorders.

Thyroid Stimulating Hormone ... $39
Controls thyroid gland function. If your thyroid gland is over or under producing hormone, your doctor may recommend that your TSH be screened regularly.
