Sexual harassment may result from verbal or physical conduct or written or graphic material. Sexual harassment may include, but is not limited to: verbal harassment or abuse; pressure for sexual activity; repeated remarks to a person, with sexual or demeaning implication; unwelcome touching; or suggesting or demanding sexual involvement accompanied by implied or explicit threats concerning a student's grades, participation in extra-curricular activities, etc.

Unacceptable student conduct may or may not constitute sexual harassment, depending on the nature of the conduct and its severity, pervasiveness and persistence. Behaviors which are unacceptable but do not constitute harassment may provide grounds for discipline under the code of student conduct.

If discrimination or harassment has occurred, the district will take prompt, remedial action to prevent its reoccurrence.

An employee who witnesses an act of sexual harassment shall report the incident to the building principal. Employees who fail to report complaints or incidents of sexual harassment to appropriate school officials may face disciplinary action. School administrators who fail to investigate and take appropriate corrective action in response to complaints of sexual harassment may also face disciplinary action.

When a complaint contains evidence of criminal activity or child abuse, the building coordinator or district coordinator shall report such conduct to the appropriate law enforcement or DCF authorities.

To the extent possible, confidentiality will be maintained throughout the investigation of a complaint. The desire for confidentiality must be balanced with the district's obligation to conduct a thorough investigation, to take appropriate corrective action or to provide due process to the accused.

The filing of a complaint or otherwise reporting sexual harassment shall not reflect upon the individual's status or grades. Any act of retaliation or discrimination against any person who has filed a complaint or testified, assisted, or participated in any investigation, proceeding, or hearing involving a sexual harassment complaint is prohibited. Any person who retaliates is subject to immediate disciplinary action, up to and including expulsion for a student or termination of employment for an employee.

JGFGA - Administration of Emergency Opioid Antagonists

Kansas law creates standards governing the use and administration of emergency opioid antagonists approved by the U.S. Food and Drug Administration ("FDA") to inhibit the effects of opioids and for the treatment of an opioid overdose. Any first responder or school nurse is authorized to possess, store, distribute, and administer emergency opioid antagonists as clinically indicated, provided that all personnel with access to emergency opioid antagonists are trained in proper protocol.

Similarly, Kansas law allows a patient or bystander (meaning a family member, friend, caregiver, or other person in a position to assist a person who the bystander believes to be experiencing an opioid overdose) to acquire and utilize emergency opioid antagonists.

Therefore, to further prioritize student health and safety in its schools, programs, and activities, the district shall obtain, store, and administer the emergency opioid antagonist Naloxone, which is commonly known by the brand name Narcan, for emergency use in its schools. A stock supply of Naloxone may consist of one or more standard-dose prepackaged nasal spray devices. The school nurse and other properly trained and designated district staff members may administer such medication in emergency situations to an individual who displays the signs and symptoms of opioid overdose at school, on school property, or at a school-sponsored event if such school nurse or designated school staff member reasonably believes that an individual is exhibiting the signs and symptoms of an overdose. Opioid antagonists may be available during the regularly scheduled school day. They may be available at other times at the discretion of the superintendent.

The board establishes the following rules governing the utilization and administration of emergency opioid antagonists, such as, but not necessarily limited to, Naloxone, by members of district staff.

Training

If obtaining the emergency opioid antagonist through a pharmacy, the providing pharmacy of the emergency opioid antagonist (hereafter "the product") shall provide written education and training materials to the individual to whom the product is dispensed. First Aid for Opioid Overdose must be obtained by each school nurse and other staff members designated by the superintendent to respond to potential opioid overdose situations. In addition, all district staff members with access to emergency opioid antagonists shall be trained, at a minimum, on the following:

- Techniques to prevent opioid overdose, to recognize signs of such an overdose and to effectively respond thereto;
- Standards and procedures to safely store the emergency opioid antagonist where readily accessible to the school nurse, if applicable, or other designated school staff members responsible for distribution and administration of the emergency opioid antagonist;

- Spotting potential side effects or adverse events that may occur as a result of administering an emergency opioid antagonist;
- Emergency follow-up procedures, including the requirement to summon emergency medical services either immediately before or immediately after administering an emergency opioid antagonist to a patient;
- Inventory requirements, recordkeeping, and reporting any administration of an emergency opioid antagonist to the school nurse or another healthcare provider; and
- Availability of drug treatment programs.

District staff members personally acquiring such products for use as a patient or bystander are encouraged to inform the school nurse or the superintendent's designee, so that they may be trained in proper protocol and included in the school or district's crisis response plan regarding potential opioid overdose.

Procurement of the Product

The school nurse or other staff member(s) designated by the superintendent will be responsible for the procurement of the product.

Storage

The following storage protocols shall be followed:

- The product will be clearly marked and stored in an accessible place at the discretion of the school nurse or the superintendent's designee.
- The product will be stored in accordance with the manufacturer's instructions to avoid extreme cold, heat, and direct sunlight.
- Inspection of the product shall be conducted at least quarterly.
- The individual responsible for the product's safekeeping shall check, document, and track the expiration date found on the box. Pursuant to Kansas law, "emergency opioid antagonist" is defined to include an expired emergency opioid antagonist up to 10 years past the products expiration date. Therefore, the individual responsible for the product's safekeeping shall replace the product on or before the 10th anniversary of its expiration date.

Use of the Product

In case of a suspected opioid overdose, the school nurse, designee, or other individual shall follow the protocols outlined in the training or product instructions in administering the product.

Follow-up

- After administration of the product, the school nurse, or other designated staff, will report appropriate information to emergency services, parents (guardians), central office personnel, and if determined necessary, the patient will be transported to a hospital.
- The school nurse or other designated staff will complete the designated incident report and file the report with the school nurse or district office, whichever is applicable.

Limitations on School Nurses

While Kansas law supports the use of emergency opioid antagonists for up to 10 years after their expiration dates, school nurses are not to prescribe, dispense, distribute, or furnish expired emergency opioid antagonist, in order to protect their professional licenses.

Gifts, Grants, and Donations

The board is authorized by law to accept monetary gifts, grants, and donations to provide a stock supply of Naloxone for emergency use in its schools or may accept Naloxone nasal spray devices from manufacture or wholesalers.

Protection from Liability

Any patient, bystander, school nurse, a first responder, or technician operating under a first responder agency, who, in good faith and with reasonable care, receives and administers an emergency opioid antagonist pursuant to this policy to a person experiencing a suspected opioid overdose shall not, by an act or omission, be subject to civil liability or criminal prosecution, unless personal injury results from the gross negligence or willful or wanton misconduct in the administration of the emergency opioid antagonist.

Publish Policies and Procedures

The district shall publish information related to its Naloxone policies and procedures in student handbooks and any other locations, as determined by appropriate by the superintendent.

A stock supply of epinephrine may consist of one or more standard-dose or pediatric-dose epinephrine delivery systems. A school nurse or designated school personnel may administer epinephrine in an emergency situation to any individual who displays the signs and symptoms of anaphylaxis at school, on school property or at a school-sponsored event if the staff member reasonably believes that an individual is exhibiting the signs and symptoms of an anaphylactic reaction.

A stock supply of albuterol may consist of one or more albuterol metered-dose inhalers, one or more doses of albuterol solution and one or more spacers or nebulizers. A school nurse or designated school personnel may administer albuterol in an emergency situation to any individual who displays the signs and symptoms of respiratory distress at school, on school property or at a school-sponsored event if the staff member reasonably believes that an individual is exhibiting the signs and symptoms of respiratory distress.

A school that maintains a stock supply of emergency medication shall adhere to the following requirements and establish procedures in accordance therewith:

- The emergency medication will be stored in a safe location that is readily accessible to the school nurse or designated school personnel in accordance with manufacturer temperature recommendations;
- The school nurse or designated school personnel shall periodically monitor the inventory and expiration dates of the emergency medication;
- Emergency medication shall only be administered by designated school personnel; and
- Training requirements for designated school personnel shall be conducted as outlined in this policy.

Information related to the school's emergency medication policies and procedures shall be published _____.

A school may accept monetary gifts, grants, and donations to carry out the provisions of this section or may accept epinephrine delivery system, albuterol metered-dose inhalers, albuterol solution, spacers, or nebulizers from a manufacturer or wholesaler.

Training

Training shall be conducted by a school nurse, physician, or mid-level practitioner at least annually for designated school personnel. Such training shall include, but may not be limited to, the following:

- Recognition of the symptoms of anaphylaxis and respiratory distress;
- Administration of emergency medication;
- Calling for emergency medical system responders;
- Monitoring the condition of an individual after emergency medication has been administered;
- Notification of the parent, guardian, or next of kin; and
- Safe disposal and sanitation of used equipment.

The school shall maintain records of the training provided to designated school personnel.

Use of Stock Medication

If epinephrine or albuterol is administered in an emergency situation, the school nurse, designee, or other individual shall follow the protocols outlined in the training or product instructions.

Follow-up

After administration of the emergency medication, the school nurse or other designated staff member will report appropriate information to emergency services, parents or guardians, central office personnel, and, if determined necessary, the patient will be transported to a hospital.

The school nurse or other designated staff member will complete an incident report and file the report with the school nurse or district office, whichever is applicable.

Protection from Liability

The practice of the healing arts shall not be construed to include any person administering epinephrine or albuterol in emergency situations to an individual if:

- The person administering the epinephrine reasonably believes that the individual is exhibiting the signs and symptoms of an anaphylactic reaction; or
- The person administering the albuterol reasonably believes that the individual is exhibiting the signs and symptoms of respiratory distress;

Supervision of Medications **JGFGB**

(See JGFGBA)

The supervision of medications shall be in strict compliance with the rules and regulations of the board as carried out by district personnel. Diagnosis and treatment of illness and the prescribing of drugs and medicines are not the responsibility of the public schools and are not to be practiced by any school personnel, including school nurses, unless authorized. No medications shall be dispensed or administered if prohibited by state law.

In certain circumstances when medication is necessary for the student to remain in school, the school may cooperate with parents in the supervision of medication that the student will use. However, the medical person authorized to prescribe medication or the parent if it is a non-prescription medication must send a written order to the building administrator who may supervise the administration of the medication or treatment. The parents must submit a written request to the building administrator requesting the school's cooperation in such supervision and releasing the school district and personnel from liability.

School personnel shall not be required to be custodians of any medication except as required by a written order of a licensed medical person or in the case of nonprescription medication when requested in writing by the parents.

The medication shall be examined by the school employee administering it to determine that it appears to be in the original container, to be properly labeled, and to be properly authorized by the written order of licensed medical person. Two containers, one for home and one for school, should be requested from the pharmacist.

Any changes in type of drugs, dosage, and/or time of administration should be accompanied by updated physician and parent permission signatures and a newly labeled pharmacy container.

All medication maintained in the school setting should be kept in a locked container. This includes medication requiring refrigeration.

Medications should be inventoried every semester. Out-of-date stock should be returned to the parent or destroyed.

Over-the-counter medications should not be maintained on any school premises, including athletic areas, unless written parent permission to administer is obtained.

The building administrator may choose to discontinue the administration of medication provided that the parents or medical person are notified in advance of the date and the reasons for the discontinuance.

After medication is administered, students should be observed for possible reactions to the medication. This observation may occur at the site of administration or in the classroom as a part of the normal routine.

This policy shall be shared with all local physicians and dentists where practicable. Forms should also be made available to the health care providers in the community.

An individual record should be kept of each medication administered. The record should include student identification, date prescribed, name of medication, time and date(s) administered, signature of person administering and section for comments.

In the administration of medication, the school employee shall not be deemed to have assumed any legal responsibility other than acting as a duly authorized employee of the school district.

The custodian may disclose students' education records to the following persons without the prior consent of the parents:

- Other school officials, including teachers within the district who have legitimate educational interests;
- Officials of other schools or school systems in which the student intends to enroll. The school district will forward student records to such institutions without further notice to the parents or eligible student when the disclosure is initiated by a parent or eligible student, or an annual notice provided to parents and eligible students by the district informs them that such records will be automatically disclosed to these institutions for the purposes of enrollment or transfer of the student;

Administration of Emergency Opioid Antagonists **JGFGA**

Kansas law creates standards governing the use and administration of emergency opioid antagonists approved by the U.S. Food and Drug Administration ("FDA") to inhibit the effects of opioids and for the treatment of an opioid overdose. Any first responder or school nurse is authorized to possess, store, distribute, and administer emergency opioid antagonists as clinically indicated, provided that all personnel with access to emergency opioid antagonists are trained in proper protocol.

Similarly, Kansas law allows a patient or bystander (meaning a family member, friend, caregiver, or other person in a position to assist a person who the bystander believes to be experiencing an opioid overdose) to acquire and utilize emergency opioid antagonists.

Therefore, to prioritize student health and safety in its schools, programs, and activities, the board authorizes the district to obtain, store, and administer naloxone, Narcan, and/or other opioid antagonists for emergency use in its schools. The school nurse or other properly trained staff member may administer such medication in emergency situations. Opioid antagonists may be available during the regularly scheduled school day. They may be available at other times at the discretion of the superintendent.

The board establishes the following rules governing the utilization and administration of emergency opioid antagonists, such as, but not necessarily limited to, naloxone and Narcan, by members of district staff.

Training

If obtaining the emergency opioid antagonist through a pharmacy, the providing pharmacy of the emergency opioid antagonist (hereafter "the product") shall provide written education and training materials to the individual to whom the product is dispensed. First Aid for Opioid Overdose must be obtained by each school nurse and other staff members designated by the superintendent to respond to potential opioid overdose situations. In addition, all of district staff members with access to emergency opioid antagonists shall be trained, at a minimum, on the following:

- Techniques to recognize signs of an opioid overdose;
- Standards and procedures to store, distribute, and administer emergency opioid antagonist;
- Emergency follow-up procedures, including the requirement to summon emergency ambulance services either immediately before or immediately after administering an emergency opiod antagonist to a patient; and
- Inventory requirements and reporting any administration of any emergency opioid antagoinist to the school nurse or another healthcare provider.

District staff members personally acquiring such products for use as a patient or bystander are encouraged to inform the school nurse or the superintendent's designee, so that they may be trained in proper protocol and included in the school or district's crisis response plan regarding potential opioid overdose.

Storage

The following storage protocols shall be followed:

The product will be clearly marked and stored in an accessible place at the discretion of the school nurse or the

Procurement of the Product

The school nurse or other staff member(s) designated by the superintendent will be responsible for the procurement of the product.

- The product will be stored in accordance with the manufacturer's instructions to avoid extreme cold, heat, and direct sunlight.
- Inspection of the product shall be conducted at least quarterly.
- The individual responsible for the product's safekeeping shall check, document, and track the expiration date found on the box and replace the product once it has expired.

Use of the Product

In case of a suspected opioid overdose, the school nurse, designee, or other individual shall follow the protocols outlined in the training or product instructions.

Follow-up

- After administration of the product, the school nurse, or other designated staff, will report appropriate information to emergency services, parents (guardians), central office personnel, and if determined necessary, the patient will be transported to a hospital.
- The school nurse or other designated staff will complete the designated incident report and file the report with the school nurse or district office, whichever is applicable.

Protection from Liability

Any patient, bystander, school nurse, a first responder, or technician operating under a first responder agency, who, in good faith and with reasonable care, receives and administers an emergency opioid antagonist pursuant to this policy to a person experiencing a suspected opioid overdose shall not, by an act or omission, be subject to civil liability or criminal prosecution, unless personal injury results from the gross negligence or willful or wanton misconduct in the administration of the emergency opioid antagonist.

A stock supply of epinephrine may consist of one or more standard-dose or pediatric-dose epinephrine auto-injectors. A school nurse or designated school personnel may administer epinephrine in an emergency situation to any individual who displays the signs and symptoms of anaphylaxis at school, on school property or at a school-sponsored event if the staff member reasonably believes that an individual is exhibiting the signs and symptoms of an anaphylactic reaction.

A stock supply of albuterol may consist of one or more albuterol metered-dose inhalers, one or more doses of albuterol solution and one or more spacers or nebulizers. A school nurse or designated school personnel may administer albuterol in an emergency situation to any individual who displays the signs and symptoms of respiratory distress at school, on school property or at a school-sponsored event if the staff member reasonably believes that an individual is exhibiting the signs and symptoms of respiratory distress.

A school that maintains a stock supply of emergency medication shall adhere to the following requirements and establish procedures in accordance therewith:

- The emergency medication will be stored in a safe location that is readily accessible to the school nurse or designated school personnel in accordance with manufacturer temperature recommendations;
- The school nurse or designated school personnel shall periodically monitor the inventory and expiration dates of the emergency medication;
- Emergency medication shall only be administered by designated school personnel; and
- Training requirements for designated school personnel shall be conducted as outlined in this policy.

Information related to the school's emergency medication policies and procedures shall be published on the school website.

A school may accept monetary gifts, grants, and donations to carry out the provisions of this section or may accept epinephrine auto-injectors, albuterol metered-dose inhalers, albuterol solution, spacers, or nebulizers from a manufacturer or wholesaler.

Training

Training shall be conducted by a school nurse, physician, or mid-level practitioner at least annually for designated school personnel. Such training shall include, but may not be limited to, the following:

- Recognition of the symptoms of anaphylaxis and respiratory distress;
- Administration of emergency medication;
- Calling for emergency medical system responders;
- Monitoring the condition of an individual after emergency medication has been administered;
- Notification of the parent, guardian, or next of kin; and
- Safe disposal and sanitation of used equipment.

The school shall maintain records of the training provided to designated school personnel.

Use of Stock Medication

If epinephrine or albuterol is administered in an emergency situation, the school nurse, designee, or other individual shall follow the protocols outlined in the training or product instructions.

Follow-up

After administration of the emergency medication, the school nurse or other designated staff member will report appropriate information to emergency services, parents or guardians, central office personnel, and, if determined necessary, the patient will be transported to a hospital.

The school nurse or other designated staff member will complete an incident report and file the report with the school nurse or district office, whichever is applicable.

Protection from Liability

The practice of the healing arts shall not be construed to include any person administering epinephrine or albuterol in emergency situations to an individual if:

- The person administering the epinephrine reasonably believes that the individual is exhibiting the signs and symptoms of an anaphylactic reaction; or
- The person administering the albuterol reasonably believes that the individual is exhibiting the signs and symptoms of respiratory distress;
- A physician or mid-level practitioner, after reviewing the school's policies and procedures, has authorized, in writing, the school to maintain a stock supply of emergency medication; and

- The emergency medication is administered at school, on school property or at a school-sponsored event.

Any person who in good faith renders emergency care or treatment, without compensation, through the administration of emergency medication to an individual at school, on school property, or at a school-sponsored event, and any school that employs or contracts such person shall not be held liable for any civil damages as a result of such care or administration or as a result of any act or failure to act in providing or arranging further medical treatment when the person acts as an ordinary reasonably prudent person would have acted under the same or similar circumstances.

KASB Recommendation – 12/24

Supervision of Medications **JGFGB**

(See JGFGBA)

The supervision of medications shall be in strict compliance with the rules and regulations of the board as carried out by district personnel. Diagnosis and treatment of illness and the prescribing of drugs and medicines are not the responsibility of the public schools and are not to be practiced by any school personnel, including school nurses, unless authorized. No medications shall be dispensed or administered if prohibited by state law.

In certain circumstances when medication is necessary for the student to remain in school, the school may cooperate with parents in the supervision of medication that the student will use. However, the medical person authorized to prescribe medication or the parent if it is a non-prescription medication must send a written order to the building administrator who may supervise the administration of the medication or treatment. The parents must submit a written request to the building administrator requesting the school's cooperation in such supervision and releasing the school district and personnel from liability.

School personnel shall not be required to be custodians of any medication except as required by a written order of a licensed medical person or in the case of nonprescription medication when requested in writing by the parents.

The medication shall be examined by the school employee administering it to determine that it appears to be in the original container, to be properly labeled, and to be properly authorized by the written order of licensed medical person. Two containers, one for home and one for school, should be requested from the pharmacist.

Any changes in type of drugs, dosage, and/or time of administration should be accompanied by updated physician and parent permission signatures and a newly labeled pharmacy container.

All medication maintained in the school setting should be kept in a locked container. This includes medication requiring refrigeration.

Medications should be inventoried every semester. Out-of-date stock should be returned to the parent or destroyed.

Over-the-counter medications should not be maintained on any school premises, including athletic areas, unless written parent permission to administer is obtained.

The building administrator may choose to discontinue the administration of medication provided that the parents or medical person are notified in advance of the date and the reasons for the discontinuance.

After medication is administered, students should be observed for possible reactions to the medication. This observation may occur at the site of administration or in the classroom as a part of the normal routine.

This policy shall be shared with all local physicians and dentists where practicable. Forms should also be made available to the health care providers in the community.

An individual record should be kept of each medication administered. The record should include student identification, date prescribed, name of medication, time and date(s) administered, signature of person administering and section for comments.

In the administration of medication, the school employee shall not be deemed to have assumed any legal responsibility other than acting as a duly authorized employee of the school district.
