

Most students
are eligible for
tuition-free
classes.

Industry Certification

Students are provided with the knowledge and skills required of Certified Nursing Assistants in various health care settings, including long-term and acute care facilities. This program combines nursing assistant theory with hands-on client care skills in a practice lab setting.

Workforce training skills are also integrated throughout the course to develop soft skills, resume writing and other job readiness skills. There is NO COST to the participant for this program.
