Health & Dental Examination Requirements

As of July 1st, 2018, New York State law requires all students entering the school district for the first time such as **new enrollments**, **pre-k**, or **kindergarten** must receive a mandatory health exam. The health exam is required *again* when the students begin: **1st Grade, 3rd Grade, 5th Grade, 7th Grade, 9th Grade, and 11th Grade**. A copy of the health exam must be submitted to the school health office within 30 days of the start of the new school year.

Your child's physical is valid if they regularly attend well child visits every year.

You will need to call your child's doctor office:

1) *Verify the date of your child's last physical with in the past 12months and request a copy of the physical and immunization records to provide to the school health office.*

OR

2)*In the event your child has **not** been to the doctor recently, you will need to schedule an appointment for a physical. This will ensure your child is able to have a physical completed along with any required immunizations before the start of the new school year.*

Hearing/Vision/Scoliosis Screening Notice

If the doctor office does not preform or fails to fully complete the hearing, vision, or scoliosis screening on the physical form at the time of your health examination, the school medical director in collaboration with the school nurse is required to do so. *If you do not wish for the school nurse or medical director to routinely screen your child in the upcoming school year, you are required to submit a written note expressing this to the school nurse within 30 calendar days of the beginning of the new school year.*

Dental Health Certificate

This form indicates your child has been evaluated by a dentist or dental hygienist in the past year and is requested at the time of your child's health exam. The school will provide a list of dentists and registered dental hygienists that offer dental services on a reduced cost basis if you request it.
