

Rumson-Fair Haven Regional High School

Course: *Portfolio and Design Honors*

Staff Writers: Kristen Lanfrank and Alexa James

Supervisor: Seth Herman

Board Approval: August 2026

Section I: Course Description

Portfolio and Design Honors is an intensive studio course designed for serious art students intending to pursue higher education in the visual arts or those seeking to master college-level technical skills. Mirroring the expectations of a college-level drawing and painting curriculum, this course moves beyond simple assignments toward a focus on individual voice, technical mastery, and conceptual depth. Students will be challenged to transition from "making projects" to "developing a body of work." Central to this course is the documentation of the creative journey; students are required to maintain a professional-grade sketchbook that serves as a laboratory for visual thinking, research, and experimentation. This course is designed to bridge the gap between high school art and the rigorous expectations of a college-level foundation program. It emphasizes the "process-over-product" mentality that admissions officers and the College Board look for.

The following unit templates have been established for the *Portfolio and Design Honors* curriculum by the *Portfolio and Design Honors* instructional team:

Unit I: Observations, Oil Painting, Sketchbook		
Unit Summary		
In this unit, students will begin developing their fine art portfolio by creating numerous observational compositions that demonstrate a variety of media and skills. Students will be introduced to oil paint as a medium and create an original oil painting. Students will begin to use their sketchbook as a tool to work out the entire process for each piece of artwork they create. Students will use sketchbooks to research, thumbnail, and gather references. Students will only be creating original artwork in this unit and will only be using their own photographs for references.

How is this different from other painting media?	- Creating high-level original portfolio artwork that demonstrates different perspectives, media, and compositional design is essential for a strong portfolio. - Fine art portfolios can be used for both fine art programs or as a supplement to support college applications. - It is essential to use a sketchbook for each piece of artwork created to demonstrate the artistic process. Each page should have research, brainstorming, thumbnails, references, and art historical connections. - Artists must often prepare the materials on which they paint. Students will utilize the methods demonstrated by the instructor using stretcher bars, canvas, and gesso. - Oil paint is a medium that requires mastery of a variety of techniques. Students will demonstrate color mixing and process, as well as complete an original painting that shows the understanding of techniques and color.

Unit Summary
In this unit, students will work on an original self-portrait demonstrating interesting perspective and expression. Students will experiment and build upon new media as well as media they have used in the past. Students will continue to use their sketchbook to work out the process and create more art that will be used in their portfolio.

In this unit, students will continue developing their fine art portfolio by creating numerous observational compositions that demonstrate a variety of media and skills. Students will be introduced to numerous printmaking techniques such as dry point etching and gelli printing. Students will learn the process of making “prints” and creating editions. Students will continue to use their sketchbook as a tool to work out the entire process for each piece of artwork they create. Students will use sketchbooks to research, thumbnail, and gather references. Students will explore using more than one medium together to create mixed media art compositions.

Unit Essential Questions	Unit Enduring Understandings
- What is the printmaking process, and how does it differ from traditional painting and drawing? - How is value used when etching? - How can an artist’s sketchbook be used to demonstrate the process? - How can an artist make more advanced observational compositions? - What is critique? Why is it important?	- A print can be reproduced in a series. This is a valuable skill for any artist who may pursue the commercial aspect of creating art. - Artists must use etching when printmaking since they do not have the luxury of being able to blend as they would with graphite or charcoal. - Developing artists should use a sketchbook for each artwork created to demonstrate the process. Each page should have research, brainstorming, thumbnails, references, and art historical connections. - There are several approaches that artists can use to develop advanced observational compositions, including creating ideas that build upon previous principles of art and design, taking personal photographs for reference, and using a variety of media and more advanced original ideas for observations. - Participating in group critiques and using proper vocabulary when talking about art allows students to give and receive proper feedback and ultimately improve their artwork.

Appendix ***Writing Instruction and the RFH Community***

Writing instruction should happen across the RFH Community. Writing across the curriculum is a philosophy that advances the belief that writing is a method of learning. Since all departments are committed to helping students learn, writing must be used as a methodology to advance student learning.

Each academic discipline has its own unique conventions, formats and structures. It is the responsibility of each department to agree upon domain-specific writing praxes, model them for students, and require them to utilize them on a consistent basis. Students must understand that acceptable writing in one domain may not be acceptable writing in another area. The development of domain-specific writing skills supports the overall development of the student writer because all writing is

grounded in the writing situation: audience, context, purpose, subject, and writer. Representatives from the academic disciplines must share their domain-specific writing praxes with each other, identify intersections, and determine how to address perceived gaps that limit student learning.

Students must experience writing situations that help them learn how to think creatively and critically and communicate effectively in the academic disciplines. Writing instruction, regardless of the academic discipline, must always reinforce student understanding of the writing situation. When students experience writing situations, they must study examples of domain-specific writing in order to understand how writers communicate in discipline-related contexts. This does not mean information embedded in textbooks. Domain-specific writing is writing that is used to inform and influence readers as it draws them into an established circle of discourse. Students must use these non-fiction texts to develop the close reading skills that will shape their own writing. Focused engagement with domain-specific writing should not be limited to basic reading comprehension and topical understanding. It must also include the analysis of the writing situation that is represented in the text: audience, context, purpose, subject, and writer. The close reading of well-written texts—regardless of the domain—will show students the importance of writing mechanics, diction, and syntax. The development of close reading skills will also help the students grow in terms of their ability to construct and advance independent and original claims that are well-supported by evidence. Domain-specific writing is grounded in positioning of claims and the effective use of evidence.

The final written product is important; nevertheless, the learning that results in this production must not be devalued. The writing process is not limited to the basic steps of planning, drafting, revising, and editing/proofreading. It is a complex sequence of critical and creative thinking and writing that leads to the production of a text that provides evidence of learning and understanding. Students must ultimately develop the ability to self-assess the effectiveness of their writing as a representation of the writing situation. Without the use of models that evidence learning and understanding, students will not develop the ability to self-assess their own work—the true outcome of the writing process.

What types of writing situations should RFH students engage in?

RFH students should engage in writing situations across the curriculum that require them to:

- write to improve mechanical proficiency, diction usage, and syntactical sophistication
- write to narrate, describe, and reflect
- write to summarize and report
- write to classify and define
- write to explain how process leads to an outcome
- write to compare, contrast and evaluate
- write to speculate on cause and effect
- write to propose solutions and solve problems
- write to analyze

These writing situations should be positioned in a coordinated, developmental sequence that extends across the academic disciplines.

Upon Completion of Grade 12, RFH students must be ready to transition to the following writing situations:

- write to analyze
- write to persuade (argument)

The core focus of first-year college writing courses are analysis and argument. These courses orient the students to the demands and expectations of writing for the academic culture of college. At colleges/universities with carefully coordinated writing programs, students must demonstrate proficiency in analysis and argument before they transition to upper level courses that require them to engage in the following writing situation:

- write to investigate (research)
