

MEASURE E BOND PROGRAM

Measure E at Work

Growing Our Future

August 2026 | Volume 1 | Issue 1

As students return for the 2026 - 2027 school year, Measure E improvements are taking shape across Oxnard Union High School District.

From major projects at Del Sol and Channel Islands high schools to roofing, painting, infrastructure and campus improvements across the district, our community's investment is becoming increasingly visible.

Follow along as we share the latest Measure E project photos, progress and updates.

Major Projects Taking Shape

Del Sol High School Stadium and Athletic Field Improvements

Channel Islands High School Aquatics Center

Two of the district's most significant Measure E projects continue to move forward.

Del Sol High School

TARGET COMPLETION | AUGUST 2027

At *Del Sol High School*, work on the new stadium and sports fields is transforming the campus. The football field and stadium are taking shape, while work continues on the surrounding athletic facilities. The project is currently targeting completion in August 2027.

Channel Islands High School

UNDER CONSTRUCTION | AQUATICS CENTER

At *Channel Islands High School*, construction of the school's first-ever Aquatics Center continues to advance. The project will provide a new home for swimming and water polo and expand opportunities for students and the surrounding community. OUHSD broke ground on the project in September 2025, and construction photos now show the pool structure emerging from the ground.

Summer Improvements Across Our Campuses

Exterior Painting

Rancho Campana Walkway Project

These projects represent the **first wave of Measure E improvements** reaching our campuses. Roofing work at **Adolfo Camarillo High School** addresses long-standing maintenance needs, while exterior painting refreshes the look and feel of aging buildings. The new dust collector system supports Career Technical Education programs. At **Oxnard High School**, exterior painting is underway, and at **Rancho Campana High School**, walkway improvements enhance safety and accessibility for students and staff.

MEASURE E BOND PROGRAM

Accountability to Our Community

Looking Ahead

- Safety and Security
- Athletics
- Career Technical Education
- Classrooms and Libraries
- Performing Arts
- HVAC and Infrastructure
- Green Energy

Accountability Matters

Citizens' Bond Oversight Committee
