PRIMARY REQUIRED EXPLORATIONS

(GRADES 1-3)

Use this checklist to assist you in planning for registration.

All 1st grade required courses are offered every year and will be scheduled for the students. The 2nd and 3rd grade required classes alternate each year. Each student must complete the two science and two social studies courses each year.

These classes complete the FNSBSD science curriculum objectives for grades 1-3, which are aligned with Alaska State Standards.

PRIMARY SCIENCE (Grades 1-3)

☐ Explore Plants & Animals (1)	Offered Every Year
☐ Junior Scientists (1)	Offered Every Year
☐ Explore Earth Science (2-3)	Offered in 27/28
☐ Explore Physical Science Grades 2-3	Offered in 26/27
☐ Explore Motion and Machines (2-3)	Offered in 27/28
☐ Explore Life Science Grades 2-3	Offered in 26/27

PRIMARY SOCIAL STUDIES (Grades 1-3)

☐ My Place, Time & Space (1)	Offered Every Year
☐ Our Town, Government & Politics (2-3)	Offered in 27/28
☐ Last Frontier (2-3)	Offered in 26/27
☐ Me on the Map, World Geography (2-3)	Offered in 27/28
☐ Time Machine, History of Fairbanks (2-3)	Offered in 26/27

INTERMEDIATE REQUIRED EXPLORATIONS

(GRADES 4-8)

These classes complete the FNSBSD science curriculum objectives for grades 4-8 which are aligned with Alaska State Standards.

INTERMEDIATE SCIENCE (Grades 4-8)

4TH GRADE

_____ Beginning Science Methods	Offered Every Year
--	---------------------------

_____ Shocking Experience	Offered Every Year
----------------------------------	---------------------------

5TH & 6TH GRADE

_____ Tangled Webs & 6th Kingdom	Offered in 26/27
--	-------------------------

_____ Wave Rave	Offered in 27/28
------------------------	-------------------------

_____ Blood & Guts	Offered in 26/27
-------------------------------	-------------------------

_____ Star Trek	Offered in 27/28
------------------------	-------------------------

7TH & 8TH GRADE

_____ Earthquakes	Offered in 27/28
--------------------------	-------------------------

_____ Positive Energy	Offered in 26/27
------------------------------	-------------------------

_____ Weather Detectives	Offered in 27/28
---------------------------------	-------------------------

_____ Hair Today, Gone Tomorrow	Offered in 26/27
--	-------------------------

_____ What Goes Up, Must Come Down!	Offered in 27/28
--	-------------------------

_____ Adaptation Sensation	Offered in 26/27
-----------------------------------	-------------------------

INTERMEDIATE HISTORY/SOCIAL STUDIES (Grades 4-8)

____Route 66/US Geography (4 th Grade)	2 qtrs	Offered Every Year
____Three Worlds Meet (5 th Grade)	2 qtrs	Offered Every Year
____Ancient Civilizations (6 th Grade)	2 qtrs	Offered Every Year
____Global Geography (7 th Grade)	2 qtrs	Offered Every Year
____Early US History & Gov't (8 th Grade)	3 qtrs	Offered Every Year
(Split into 1 semester of History and 1 quarter of Civics)		

PLEASE NOTE:

- Some required classes are offered on alternating years only. Plan accordingly.
- Class offerings may change based on scheduling and staffing needs.
- Changes to Explorations will require a parent or guardian signature for each quarter, prior to movement to a new class.

SYMBOL KEY

* This symbol indicates the class is **required**.

\$ This symbol indicates a material fee associated with class.

◆ This symbol indicates that the class will utilize a rigorous curriculum and will be taught at an accelerated pace. Only students who are able to meet these standards should register for these classes.

√ This Symbol indicates a class may require an audition, leveled placement, and/or occasional events outside of school hours.

^This symbol indicates an intervention in reading or math.

REQUIRED PRIMARY SCIENCE

There are two required science classes for 1st grade students. There are four essential science Explorations for primary grades (2-3), two of which are offered each alternating school year. The classes are one quarter long and every student must complete the required courses each year.

***EXPLORE PLANTS & ANIMALS (1)**

Students learn about plants and animals. They find out how each survives, grows and meets their needs. Students learn how plants and animals copy their parents and how they stand out. SC28

***JUNIOR SCIENTISTS (1)**

The Junior Scientists class will introduce science to 1st grade students. They will focus on the role of plants in the food web, heat, light, weather, and the elements. Students will improve their ability to observe, measure, and predict through simple investigations. They will learn about famous scientists such as George Washington Carver, Orville and Wilbur Wright, and Louis Pasteur. SC10

***EXPLORE PHYSICAL SCIENCE (2-3)**

Students will explore how sound is produced and travels. They will investigate the relationships between force, motion, and energy. Students will learn about electricity and its light, heat, and motion. Students will study famous scientists. In 2nd and 3rd grades, students begin to understand the scientific process and develop skills for scientific inquiry. SC05

***EXPLORE LIFE SCIENCE (2-3)**

Students will learn about plant ecosystems, fossils, and insects with an Alaskan focus. Students will continue to develop their understanding of scientific skills. SC14

REQUIRED INTERMEDIATE SCIENCE

There are 12 total required science Explorations in 4th-8th grade, seven of which are offered this school year and are listed below. The other five will be offered again the following year. These Explorations provide an overview of all district curriculum objectives in grades 4-8. After taking all of these required classes, an intermediate student will be prepared for the state science exam. The classes are designed to last one quarter. Every science Exploration at Barnette Magnet School will routinely use the science process skills of observation, prediction, hypothesis forming, data collection, and analysis. Middle school classes will be appropriately rigorous in preparation for high school.

***BEG. SCIENCE METHODS/YOU BE THE SCIENTIST (4)**

In this class, you will learn steps of the scientific method and become a pro at formulating your own hypothesis. You will apply these skills to design your own science experiment. You will also gain experience using the “tools of the trade” for measuring and analyzing results... and yes, you will get to wear cool goggles. SC04

***SHOCKING EXPERIENCE (4)**

Use wires, batteries, bulbs and switches to build series and parallel circuits. Design your own circuits. Construct wet cell batteries and learn about resistors, fuses and breakers. Students will understand how voltage, current and resistance relate to each other and will explore the relationship between electricity and magnetism. Learn the shocking facts about static electricity. SC40

***TANGLED WEBS & THE 6TH KINGDOM (5-6)**

Be the first in your neighborhood to learn of the 6th Kingdom. Identify a mystery critter using an identification key. Celebrate the diversity of life on earth. Can you say monocotyledon ten times fast? SC23

***BLOOD & GUTS (5-6)**

Ever wonder what makes up you? Students will learn through research and experiments what you are made of and how each system in your body works. SC45

***POSITIVE ENERGY (7-8)**

Define the forms of energy and investigate the transfer from one form of energy to another. This is done through inquiry labs with engineering design integrated. SC33

***HAIR TODAY, GONE TOMORROW (7-8)**

Did you inherit that tongue roll, and what's the probability of growing bald? Students will understand the role of genes in determining our traits. Learn microscope skills. SC21

***ADAPTATION SENSATION (7-8)**

Explore the variety of life! Look at dinosaur fossils, insect wings, and bird beaks – why are they how they are? Why do some things go extinct while others survive? Make a designer organism. SC32

REQUIRED PRIMARY SOCIAL STUDIES

There is one required class for 1st grade students offered every year. There are four required Explorations for 2nd and 3rd graders for Social Studies, two of which are offered each alternating school year. The classes are one quarter long and every student must complete the required courses each year. After taking all five of these required classes, your child will have completed the FNSBSD Social Studies curriculum objectives for grades 1-3, aligned with Alaska State Standards in Geography, Government and Citizenship, and History.

***MY PLACE TIME AND SPACE (1)**

In this class the student will consider and celebrate families of all types, create a personal timeline, and explore ways that people impact our environment, demonstrate citizenship and impact their communities SC50.

***LAST FRONTIER (2-3)**

Explore the wonders of The Last Frontier by traveling across the great state of Alaska. Use mapping skills to identify major geographical and political regions across the state. Study state history to compare and contrast the past with the present. Examine regional diversity in population, culture, climate, weather, land use, and transportation. SS24

***TIME MACHINE, HISTORY OF FAIRBANKS (2-3)**

Go back 100 years and spend a day in a Fairbanks classroom. Explore, identify, and locate Alaska on the map and basic land formations. Learn to describe how Athabascans and early settlers' contributions shaped the development of our community. SS03

REQUIRED INTERMEDIATE SOCIAL STUDIES

These Explorations provide an overview of district curriculum objectives in grades 4-8. After taking these required classes, a student will have completed the Social Studies curriculum objectives aligned with the Alaska State Standards in Geography, Government and Citizenship, and History.

***ROUTE 66/US GEOGRAPHY (4th)**

Students will focus their semester developing knowledge of the continents, oceans, and geography of the United States to lay the foundation for further social studies Explorations. Students will examine the factors, both physical and cultural, that help define regions in the U.S. Also, students will consider the Pacific Rim and discuss the United States' role in this fast-changing part of the world. SS33

***THREE WORLDS MEET (5th)**

In the 5th grade, the focus will be a semester study of the United States of America. Students will examine the historical perspectives that shaped the diverse physical, economic and cultural characteristics that define our country today. Students will explore how colonization led to the establishment and evolution of our nation through Native American cultures, European leaders, explorers, colonists, slaves, and immigrants. Students will explore the American government's foundations by examining relevant aspects of the U.S. Constitution, emphasizing that citizenship entails both rights and responsibilities. SS26

***ANCIENT CIVILIZATIONS (6th)**

Sixth-grade social studies will focus on ancient societies in a geographical, historical, political, and cultural context. In this semester-long course, students examine geographical influences on regional development; use maps, globes, and graphs to gather, analyze and report information; discuss current events worldwide; study the history of civilization from prehistoric times to approximately 500 A.D. The civilizations include ancient Mesopotamia, Egypt, India, China, Greece, Rome, Maya, Aztec, and Inca. Students will understand what people need to evolve into a civilization, how new civilizations began as the people's needs and beliefs changed, explain the contributions of different cultures to humankind, and examine the origins and spread of major religions and languages. SS29

***GLOBAL GEOGRAPHY (7th)**

This semester-long global geography course combines geography's physical, economic, political, and social aspects. The course will help develop students' skills as geographers by using an inquiry-based approach to learning about human-environment interaction and how this has changed over time. Through geographic inquiry, students are provided opportunities to collect information and consider a range of viewpoints about human environment interaction relationships and then synthesize this information to construct their understanding. This understanding will help students make sense of an increasingly complex world and help develop a tolerance to the differences inherent in our global society. Spatial understandings of the world enable geography students to build the skills for implementing appropriate local, national, regional, and global action in a complex and interdependent world. Students will focus their studies on the themes of geography and national geography. Students will apply the Alaska Standards for Literacy in History/Social Studies by completing a research project using primary and secondary sources. (SS42)

***EARLY US HISTORY & GOVERNMENT (8th)**

This class is a total of three-quarters focusing on the foundations of United States history from pre-colonization to settlement, into the revolution and creation of our nation, westward expansion/reform, and ultimately leading through the Civil War. Students will begin critically thinking as historians by developing research skills and evaluating primary and secondary sources. This course will explore the integration of historical periods and lay a foundation for their high school years. Additionally, students will apply the Alaska Standards for Literacy in History/Social Studies by completing a research project using primary and secondary sources. One quarter of Civics will be offered separately as part of this course curriculum, students must schedule for both the semester of History and the quarter of Civics. (SS46)

PRIMARY LITERACY

^ROCKIN' READERS (1-3)

Enjoy story time! Listen to read aloud, books on tape, learn AR skills test and practice reading with the computer. Participate in skills activities, learning games and projects. This class is for reading intervention placement. LI02

\$NATURE ART JOURNALS (2-3)

\$10.00 Fee

Study famous naturalists and scientists. Go outside to study, write, and sketch in daily journals. See the world around you with new eyes. LI41 or FA27 for supplies

INTERMEDIATE LITERACY & WRITING

THE WRITE STUFF CURSIVE & KEYBOARDING (4-8)

This class will split its time between learning handwriting and keyboarding skills. Practice handwriting with a variety of writing and artistic projects. This class will help develop the fine motor skills needed for handwriting with a fun emphasis on presentation. Work on early writing skills. Learn to type using the home row. LI22

\$THE DARING CLASS FOR GIRLS (4-5)

\$15.00 Fee

Whether you're a girly-girl, an athlete, a brainiac, or a little bit of everything, this class is designed for you! *The Daring Class for Girls* is the can-do, how-to manual for enthusiastic, unfettered adventure. This hands-on literacy class cheers girls on to be curious, brave, and above all, to have fun! LI28

\$THE DANGEROUS CLASS FOR BOYS! (4-8)

\$15.00 Fee

Learn it, build it, make it, explore it from the five knots to the seven wonders of the world that include the most complicated machine ever built. This hands-on literacy class is for boys only. A new project every day designed with boys in mind. LI27

INTERMEDIATE DEBATE

DEBATE 1 (6-8)

Want to think more clearly? Write more effectively? Speak more persuasively? Join the Barnette Debate Team! Legal voting age, benefits of artificial intelligence, who should be held accountable for misinformation... have a voice in these topics and many others. Learn to research topics, formulate opinions, speak boldly, and work with your teammates as you compete with other schools in the district and work your way to the State Tournament in Anchorage. (Highly recommended to take this class before Debate 2.) SS27

√DEBATE 2 (6-8)

Continuation of Debate 1; see “Debate 1” for class description. Keep growing your skills with three more city competitions on the way to the State Tournament in Anchorage. (**Mandatory to go to the State Tournament in Anchorage.**) SS27

MATH

^√MATH INTERVENTION (4-5)

This class boosts math skills for students improving individual math proficiency.

This class is a math intervention. MA10

^√MATH EXPLORATION (6-8)

This class boosts math skills for students with tutoring instruction from older students, as well as a math teacher. Focuses on individual skills students need to improve math proficiency. This class is a math intervention, while also providing placement for advanced tutoring towards community service hours. MA10

TECHNOLOGY

TECH STUDIO (2-3) Students will learn basic computer skills, including keyboarding, how to access Barnette servers, and navigate web browsers. Students will locate prime educational sites. Students will learn current programs and applications like Google classroom. This is a great basics and beyond class to develop computer savvy. TE53

WE DID A MOVIE (4-5) Students will learn all aspects of producing their own piece – from writing the script, creating the storyboard, rehearsing, videoing, and editing. Each student will gain experience using video equipment and different computer applications, such as iMovie, Garage Band, and iDVD. An emphasis will be placed on collaborating on one project. Projects may be entered in a state competition. TE47

STOP MOTION ANIMATION (4-5)

Learn about stop motion animation and make your own stop motion video for the iPad. TE12

GOOD MORNING BARNETTE (6-8)

Students will learn all aspects of producing a news program-what goes on in front of and behind the camera. Each student will gain experience learning the roles of anchor, camera-person, director, news reporter, technical and sound director. Each student will also learn how to write a simple interview and news report and will learn how to operate the video and sound equipment. An emphasis will be placed

on working in teams and through experience, students will gain confidence and independence in working outside of the classroom “on location.” TE43

\$BASIC ROBOTICS (4-8)

\$10.00 Fee

Students will program and control actual robots that they build themselves using specially created software and Lego building materials. TE15

\$ROBOTICS II (5-8)

\$10.00 Fee

Pick up where you left off with Basic Robotics as you design more complicated projects. (**Prerequisite is Basic Robotics**) TE17

DIGITAL STORYTELLING (6-7)

Develop the art of transforming a personal narrative into a multimedia sentence. Use music, video, and still images to engage your creative voice. The results will be an original production that will engage the viewing audience in powerful and surprising ways. TE49

LANGUAGES AND CULTURES

GAMES AND TOYS AROUND THE WORLD (2-3)(4-5)

Make a toy or game from at least three other countries. Oh, and there's time to play them too! Celebrate children's holidays around the world with fun cultural activities. Students will learn similarities and differences between toys and games from other countries and be able to locate the countries on a map. SS41

PRIMARY FINE ARTS

\$CAST OFF (2-3) (4-6)

\$10.00 Fee

Master the fundamentals of knitting and crochet as you craft a personalized hat or scarf. While working with yarn, sharpen your auditory abilities by enjoying some of the finest children's literature available.

\$NATURE ART JOURNALS (2-3)

\$10.00 Fee

Observe your natural surroundings and learn to see the beauty of nature. Students will use nature's colors, forms and materials to create works of art. FA27

INTERMEDIATE FINE ARTS

\$DRAWING 101 (4-7)

\$10.00 Fee

In this Drawing class students will explore the foundations of 2D art. From Zen Tangle animals and perspective drawing, to shading and printmaking, students will expand their knowledge of 2D art in this fantastic foundational art class. This class can be repeated! FA23

\$ INTERMEDIATE DRAWING **NEW (5-8)

\$10.00 Fee

Students who love drawing and want to take their skills to the next level will love this class! Students will explore in depth drawing techniques such as gesture drawing, shading, portrait drawing, and so much more! This class can be repeated! FA23

\$3D DESIGN (5-8) (6-8)

\$10.00 Fee

In this 3D sculpture class, students will explore varied art techniques and materials. From paper mache sculptures and plaster masks to 3D drawing techniques, students will grow in their abilities with 3D art making in this fun and messy art class. FA10

\$ TECHNIQUES IN ART (4-6) (5-8)

\$10.00 Fee

Techniques in Art is a survey art class where students explore both 2D and 3D art forms. From Yupik style masks and clay whistles to drawing techniques and pastel landscapes, students will get a taste of all different art mediums in this exciting art class. FA33

\$PROJECT CLAY (4-6) (5-8)

\$15.00 Fee

Artists will use clay tools to create projects, including pinch pots, relief figures, and more! This class can be repeated! FA35

\$NATURE ART JOURNALS (4-5)**\$10.00 Fee**

Go outside to sketch, write, and study the natural world. Students will create a wide variety of art centered around our relationship with nature. See the world around you with new eyes. LI41 or FA27 for supplies

\$CAST OFF (2-3) (4-5)**\$10.00 Fee**

Join us for a hands-on sewing class where you'll learn the art of stitching, needlework, and crafting with felt and fabric through hand sewing. From mastering basic sewing techniques to creating your own simple projects, this class is perfect for beginners looking to unleash their creativity through the power of needle and thread. Get ready to thread your way to success. FA13

THEATRE

√\$BEHIND THE CURTAIN (5-8) (Full Semester- Q1 & Q2!)**\$10.00 Fee**

Behind the Curtain explores the world of musical theater. Learn the ins and outs of putting on a full musical production. Students will perform on stage or work backstage during the performance. Students will learn about acting, singing, voice projection, stage presence, and blocking on stage. This class will be team taught. The 2023 show is Annie Jr. Performances and some rehearsals outside of school hours are required, as is a signed photo release and permission forms.

\$BEHIND THE CURTAIN CREW (5-8) (Q2 only)**\$10.00 Fee**

Behind the Curtain explores the world of musical theater. Learn the ins and outs of putting on a full musical production. Behind the scenes they will learn about the technical theater side of stage production to include the basics of lighting, sound, scenic, and costume design. Students will walk away with a better understanding of all the elements that work together to create a show. This class will be team taught. Students will work backstage during the performance. FA56

MUSIC

RAISE YOUR VOICE CHOIR (4-8)

In this course, students will develop their natural singing voices. Emphasis will be placed on posture, breathing, and producing beautiful music! Songs will be different each quarter so that interested students may take choir more than once.

WORLD BEAT ENSEMBLE (4-8)

Drum up the beat in this class offering a rhythm experience which will introduce instruments and ensemble performances. Some music notation will be taught., Emphasis will be pleased on creating rhythms using various instruments.

HANDBELL CHOIR (4-8)

Students will learn to play songs on handbells and choir chimes in this class. Basic musical skills will be taught. No music experience is necessary, only the desire to learn, work with others, and have fun. The music will be different every time, so feel free to take this class as many times as you'd like! MUS25

\$BEGINNING ELECTRIC KEYS (4-8)

\$10.00 Fee

In this course, students will learn to play an electric keyboard. Designed for students with no previous experience, the basic fundamentals of music and playing techniques will be introduced. This is piano at its finest! FA38

√BLAZERS ON STAGE (5-8)

Do you love to sing and dance? Join Barnette's show choir, Blazers on Stage! In this course, students will develop their natural singing voices through pop music and showtunes, then set it all to choreography to produce a stunning musical performance. The music will be different every quarter, so feel free to join more than once! FA54

BAND & ORCHESTRA

All Band and Orchestra classes are full year courses.

Please mark all 4 quarters on your Exploration course worksheet.

**All new players to an instrument should enroll in the 1st quarter for
Beginning Band or Beginning Orchestra.**

\$BEGINNING STRIKE UP THE BAND (4-8) QTR 1

\$15.00 Fee

Students will learn to play or continue their studies on a traditional concert and instrument from the woodwinds, brass, or percussion family. Ensemble performances will be an integral part of this course. MU11

\$STRIKE UP THE BAND (4-8) 4 QTRS

\$15.00 Fee

Students will learn to play or continue their studies on a traditional concert and instrument from the woodwinds, brass, or percussion family. Ensemble performances will be an integral part of this course. MU11

\$BEGINNING ORCHESTRA (4-8) QTR 1

\$15.00 Fee

Students will learn to play or continue their studies on a traditional string orchestra instrument. They may choose violin, viola, cello, or double bass. Ensemble performances will be an integral part of this course. MU15

\$ORCHESTRA (4-8) 4 QTRS

\$15.00 Fee

Students will learn to play or continue their studies on a traditional string orchestra instrument. They may choose violin, viola, cello, or double bass. Ensemble performances will be an integral part of this course. MU15

√\$ADVANCED SYMPHONY (6-8) 4 QTRS

\$15.00 Fee

Advanced Band and Orchestra students will learn to play in a symphonic setting, which includes all the concert band and string orchestra instruments. After they have mastered their primary instrument these advanced players will have the opportunity to take on a secondary instrument. Ensemble performance will be an integral part of this Course. MU35

PRIMARY FITNESS

\$TAEKWONDO (2-3)

\$15.00 Fee

Midnight Sun Martial Arts Academy instructs students toward the goal of earning their **yellow stripe** as they learn self-defense techniques, health, and physical fitness principles, Korean history and language and non to light contact sparring techniques. The class fee includes the white belt. FH42

\$TAEKWONDO 2 YELLOW BELT (2-3)

\$15.00 Fee

Midnight Sun Martial Arts Academy instructs students toward the goal of earning their **yellow belt** as they learn self-defense techniques, health, and physical fitness principles, Korean history and language and non to light contact sparring techniques. The class fee includes the yellow belt. FH43

YOGA & NATURE WALKS (2-3)

Take a walk on the calm side! Head outside for fresh air, take in nature around you and do yoga in the park when the weather cooperates. Students will improve their strength, balance, attention, and coordination through fun yoga games, learn yoga sequences, and partner and group poses. They will learn healthy stress and anxiety coping mechanisms and build self-esteem in a non-competitive environment. They will also learn about self-love and the importance of showing kindness to others. FH20

PLAYGROUND GAMES-DISC GAMES (4-5)

Head outside for fresh air and fun on the playground. Try your hand at some frisbee and disc golf. Students must bring their outdoor gear! FH04

INTERMEDIATE FITNESS

READY, SET, GO! (4-6)

This class will encourage physical fitness, develop individual skills and team skills, and introduce a variety of activities and sports. Weather permitting; this activity time will alternate between inside and outside activities. Students must bring their outdoor gear! FH40

SPORTS ARENA (6-8)

For the young athlete who enjoys team sports, this course will emphasize basic skills development, which is essential to succeeding in sports. The importance of physical fitness, health, nutrition, good sportsmanship and working as a team will be stressed as students participate in a variety of sports and games. FH19

\$AK SPORTS & REC (4-6) (6-8)

\$15.00 Fee

Get fit in Alaska! Activities include snowshoeing, orienteering, AK Native games, sledding, skiing and other games. Students must bring their outdoor gear. FH16/FH02

RACQUET & NET GAMES (4-6) & (6-8)

Students will be taught the proper techniques and rules for badminton, pickleball, tennis, volleyball, ping-pong, cricket, and lacrosse. FH06/08

MOVIN' & GROOVIN (4-6)

Participate in a range of outdoor activities to encourage fitness and fresh air! Students must bring their outdoor gear. FH30

YOGA & MINDFULNESS (2-3)

Students will improve their strength, balance, attention, and coordination through fun yoga games and challenging yoga sequences. They will learn healthy stress and anxiety coping mechanisms and build self-esteem in a non-competitive environment. They will also learn about self-love and the importance of showing kindness to others. FH20

HEALTH & LIFE SKILLS

\$HOME ECONOMICS- FOOD FOCUSED FUN (6-8) \$15.00 Fee

Students will touch on various skills necessary for running a home – which may include home management, design, hygiene, finances, and laundry. The focus of this course is to provide students with basic overview on culinary food principles and preparation that will provide a broad foundation for students interested in a food-related career and/or to enhance their food-related knowledge and skills for the betterment of their health. FA25
