Dear Longview Families,

As we begin the 2026-2027 school year, we would like to share with you our commitment to your child's education. We have recently attended professional development regarding the use of technology in our classrooms. We are sharing how we will adhere to the district's policies and procedures at Longview Elementary.

The purpose of the chrome book and technology will be to provide access to content and resources. For example, slides may be used in moderation for Wit & Wisdom. While using technology the children will engage actively rather than passively. This could be through simple activities such as an exit ticket. Longview teachers will secure your child's safety by using vetted and approved tools as well as by setting clear expectations. While technology is a modern way to share information, we will continue to use teaching strategies like discussions, movement and hands-on learning. This will encourage engagement beyond the screen. And finally, Longview staff will make any changes regarding technology based on student and classroom needs.

We appreciate your time and commitment to your child's education. Working together, we can strive for balance and continue to provide excellence and rigor.

Longview Elementary Faculty/Staff
