Parent/Guardian PowerSchool Set Up Directions

Go here: https://powerschool.auburnschl.edu/public/

Click on the Create Account tab and then the Create Account button.

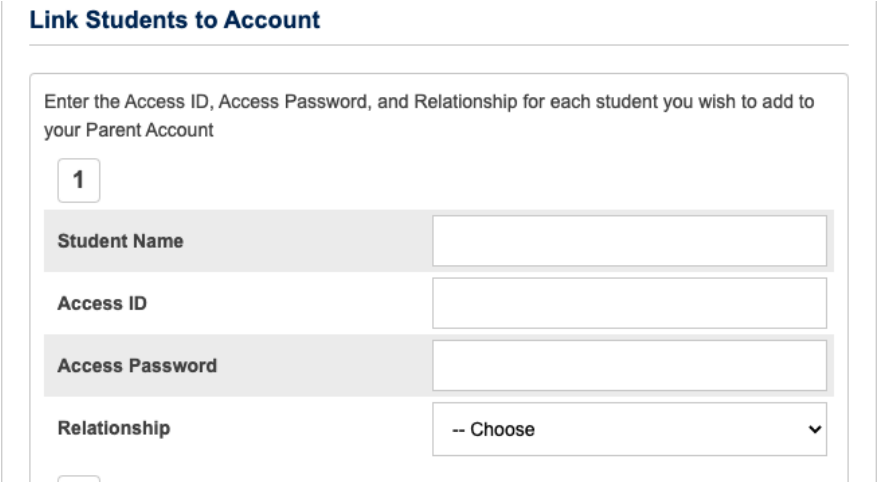

Fill in the top part of the form to create your account with a username and password you would like. This will be the username and password used to sign into the account.

The link students section allows the entry of up to 7 access IDs and passwords. In the event that you need to add more children than that, you can do so once you have finished setting up the account and log in.

Contact Edward Little's Technology Department to obtain a student's Access ID and Access Password.

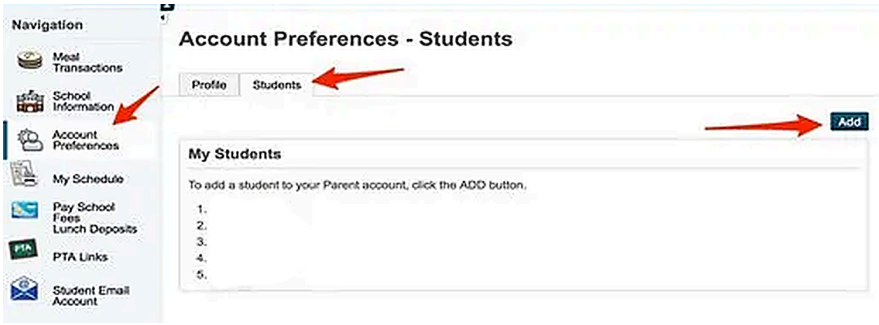

Once you've added the information for each child, scroll down and click the Enter button. You will need to verify the account by clicking the verify link sent to your email. Afterwards, you should then be able to log in using the username and password you created.

Add Students to an Existing Account

You can add students to an already existing PowerSchool account by clicking Account Preferences on the left side menu, clicking the Students tab, and then clicking the Add button.

Mobile App Set Up Directions

After creating an account through a web browser, you can start accessing your account using the PowerSchool mobile app. You will need to input the district code below.

District Code: JTMJ

The apps are available to download from Google Play and the App Store.
