

Connecting a personal Android device to CCPS Wi-Fi (2026-2027)

Connecting your device to Wi-Fi

1. Open your Android Wi-Fi Settings and select the “CCPS” Wi-Fi network.

2. Enter your CCPS username and password, and click “Connect”.

3. Your device screen should appear similar to the image below. When you have finished entering your username/password, click “Connect”

Troubleshooting Tips

- If you receive an error message “Couldn’t connect to network” or similar message, please verify that there are no spelling errors in your username or password and try again.
