

# Rivercrest Elementary August 2026

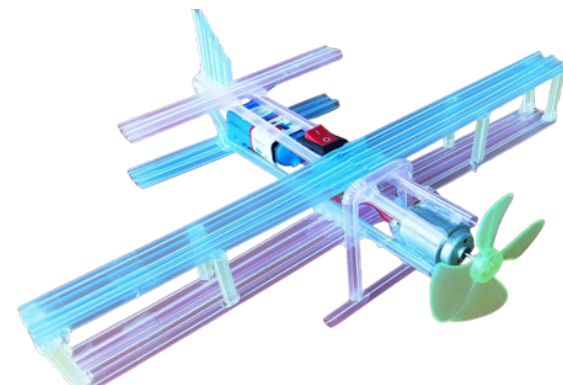

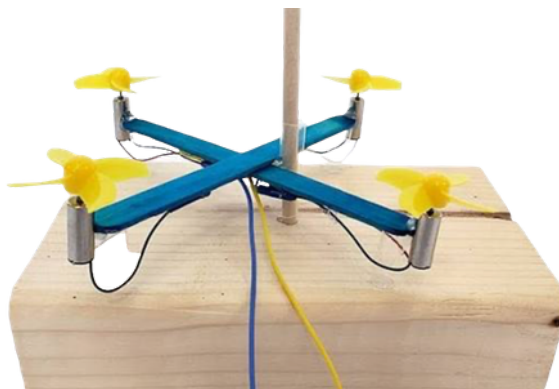

## S.T.E.A.M HOME CHALLENGE

In honor of National Aviation Day... August 19th

To participate in this home challenge, you will need to **create a Rescue Drone or plane (non-flying)** using recycled material! Your rescue vehicle does not have to fly and can be a model. You will complete the engineering design process for this home challenge using the template on back of this sheet. You can use ANY additional materials in your creation! The only rule is to BE CREATIVE! We will display all of the creations and you will receive recognition for your participation!

**S.T.E.A.M Challenge Question: How many small items could your aviation vehicle transport?**

**\*Bring your creation to school by September 4th**
