

BID ADDENDUM

Preston Field Signage Improvement

Addendum 1

PROJECT

Preston Field Signage
Improvement

ISSUED BY

Park Hill School District

TARGET COMPLETION

No later than 2/1/2027

This addendum responds to bidder questions received on the Preston Field Signage Improvement project. It clarifies scope, responsibilities, and schedule and should be read together with the original bid documents.

QUESTIONS & ANSWERS

Q1 Is the signage contractor responsible for removing existing signs, or is this task handled by others? The document seems to have a discrepancy in that regard.

A The signage contractor will be responsible for removing existing signage.

Q2 Could you please provide an existing image of Scope Item 2 – East Sign, as there seems to be no relevant information for this line item in the drawing files?

A We will not replace the “Panthers” and “Trojans.”

Q3 For alternate options of illuminated signage, could you please confirm if there is existing electrical service at the sign location?

A We would like to add electrical service to this RFP. There is no existing electrical service at the proposed signage location — there is electrical service above for general lighting, but not at the site of the signs. As a reminder, this is an alternate should the district want to move forward with illuminated signage.

Q4 If the signage contractor is responsible for bringing electric to the sign, can you please confirm the distance to the nearest electrical source?

A This will need to be confirmed onsite.

Q5 Does the district have an idea of when they want this work completed? We understand we are to provide our anticipated lead times, etc.

A We would like this completed as soon as possible, but no later than February 1, 2027.

Q6 Does this project require prevailing wage?

A This applies, per state statute, if the contract is valued above \$75,000.

Q7 Who is responsible for repainting the wall after the old letters are removed?

A It will be the responsibility of the installer to repaint or replace any masonry damage that occurs.

Q8 East sign replacement — we would appreciate photos of the existing sign. Is it possible that Hollis+Miller provide a drawing? We need to see if we have access for installation, or if any special equipment is required, since this is likely above the bleachers.

A See earlier response.

Q9 Where do you want the letters on the east side of the stadium — on the aluminum or on the brick/stone? It doesn't appear there was ever any signage on this side of the field box.

A This would go on the stone, not the aluminum. We just completed masonry work and they did a great job, so you cannot see where the previous signage was.

Q10 The drawings show a raceway that will need to be mounted in order to illuminate the west letters (alternate version). Is the district aware of this, and is it acceptable?

A Yes, we would be okay with this as an option but would entertain others.

All other terms and conditions of the original bid documents remain unchanged. Bidders should acknowledge receipt of this addendum in their submission.
