

New Trier 2026-2027 Annual Plan

Adopted in 2019, the *New Trier 2030* strategic plan has guided the District's work over the past six years through six key frameworks: *Intellectual Growth, Engagement and Readiness; Student Personal Growth, Engagement and Wellbeing; Culture, Climate, and Belonging; Leadership Throughout the School; Community Engagement, Partnerships, and Governance; and Finance, Facilities, and Human Resources.*

Each year, the Superintendent presents an Annual Plan that outlines initiatives, aligns resources, and communicates priorities across the school community, with this year's focusing on **six annual goals**. The District aims to build on seven years of progress and ensure each goal is clear, concise, measurable, and aligned with New Trier's mission and vision and the daily work of our staff and departments.

For full explanations of each goal and why this matters, including Key Actions and Success Indicators, visit www.newtrier.k12.il.us/strategicplan2030.

Experiential and Career-Connected Learning

Launch the Center for Experiential Learning and implement the Pathways Framework to connect every student with meaningful real-world learning that helps students chart an individualized path toward their future.

Characteristics of a New Trier Graduate

Empower students to tell their own unique story of who they are and what they can do by reflecting on and documenting their growth in the Characteristics.

Culture of Belonging and Wellness

Embed belonging and wellness practices across the district so students and staff feel supported and connected to each other and the institution.

Facilities Planning and Prioritization

Create modern, flexible, and sustainable learning environments by adopting the District's long-range facilities plan and presenting responsible funding options.

Access and Opportunity to Advanced Coursework

Expand access to advanced coursework by creating more pathways and opportunities for students, including AP and dual credit.

Artificial Intelligence Literacy and Leadership

Build the foundation for AI literacy, responsibility, and innovation so students and staff can learn, work, and lead in the age of artificial intelligence.
