Radon Testing Summary

Multnomah ESD and Parkrose School District complete radon testing every 10 years per Oregon policy. The concentration of radon gas in indoor air can vary widely; it fluctuates daily, seasonally, and with weather conditions. Indoor radon levels may be affected by barometric pressure, strong winds, rain-soaked ground, snow cover, heating and A/C systems, building construction, open windows, and the like. Sites are retested if any samples exceed limits, and remediation systems are installed as needed in relevant locations.

Facility Name	NCES ID	Number of tests that exceed limits	Action taken	Number of tests that exceed limits after retesting/remediation	Date of Testing/ Remediation
