As promised to voters, we are continuing efforts to spruce up the interior of Davison High School after parents repeatedly shared with us through surveys that the building looked "tired and worn." Earlier this year we highlighted work that took place in the English wing when treads on the stairwell and trim were replaced and the corridor was painted. This summer, the attention was focused on the West Corridor and Main Office areas where work included tiling, new interior wall finish, cleaning and restoration of brick, specialized treatment and cleaning on the floors and installation of a wood facade outside the office. The work was completed last week just in time to greet students on the first day of school and it looks fabulous!
