Instructional Technology Plan - 2026-2029 Instructional Technology Plan

V. NYSED Initiatives Alignment

Page Last Modified: 03/17/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

The Brookfield Central School District recognizes the responsibility to further educational goals, student performance and academic standards through the equitable use of high-quality educational technology and digital resources. The district is committed to:

- A comprehensive staff development program to maximize instructional impact.
- The integration of technology within and across all curriculum areas.
- Ensuring equitable access to technological resources and empowering students to master diverse digital platforms.

The district employs a 1:1 Chromebook initiative to ensure that digital tools are utilized in daily curriculum. By using Google Workspace for Education, instructional staff create a digital classroom environment where instructional materials, real-time feedback, and collaborative projects are accessible to every student, regardless of their physical location.

The district's staff utilizes Chromebooks as the primary interface, leveraging Google Workspace for Education to facilitate and manage instruction. They also have access to web-based curriculum and tools to facilitate a highly organized and responsive learning environment. In addition, they integrate project-based learning activities that align with classroom curriculum.

Students use Chromebooks and Google Workspace for Education (Docs, Slides, etc.) to engage in real-time collaborative projects, allowing them to demonstrate skills like communication and teamwork alongside core academic competencies. They also utilize platforms that provide immediate evidence of understanding through open-ended responses and interactive polls that provide guidance to the next instructional steps.

To support diverse learners, the district utilizes the built-in accessibility features of Chrome, including screen magnification, select-to-speak and dictation, which support students with literacy challenges or visual impairments which ensures all students, including those with physical disabilities, have the opportunity to participate fully in learning.

The district has provided cellular hotspots for students without home internet, as needed. We have implemented offline mode for Google Drive to ensure students can continue working without a continuous connection. We have established a sustainable refresh cycle for Chromebooks.

2. At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (*Select all that apply*)

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

The district does not have an active SSIP.

For help with completing the plan, please visit ITP Resources on our website, contact your district's RIC, or email edtech@nysed.gov.
