Summer Work: AP Physics 2
Contact: Email: lhyatt@kingschoolct.org and mleary@kingschoolct.org, if you have questions.

Welcome to AP Physics 2! The purpose of the summer assignment is to help you prepare for the concepts and skills we will use throughout AP Physics 2. Our first unit is on thermodynamics, which references vectors, forces, and energy to some degree. All of these topics will help us start the year in a strong position for our first unit. We will have a test on these at the end of the first week to make sure they aren't forgotten before moving into the new material. At the end of the first week of school, there will be a test covering the material from the summer assignment. This test will have the smallest weight of any test you take during the school year. Your grade will come from the summer work test, not from the summer assignment itself. Think of the assignment as an opportunity to practice and prepare for the start of the course. The goal is to give yourself a strong starting point for AP Physics 2.

Assignment
