615 Catlin Dr., Lake Mills, Wi 53551 08/07/2026

What's New?

Construction activities continued to progress across multiple areas of the project. Flooring was completed in Area C, and epoxy flooring was installed in the locker rooms. Ceiling grid installation was completed in the corridors, while plumbing fixture installation began in the locker rooms. Painting continued throughout the lower level, and installation of the new storm and sanitary piping was completed. Tile work in the locker rooms and bathrooms was also finished, marking another significant milestone as interior finishes continue to advance.

In the coming weeks, crews will focus on installing corridor flooring, starting the exterior CMU gym block walls, and installing bathroom toilet partitions. Work will also continue on the remaining concrete foundations and door installation. Additional activities will include applying epoxy flooring in the kitchen, completing the final cleaning of the lower level, and installing the remaining ceiling tiles and final ceiling fixtures. These activities will continue to advance the project toward completion.

Completed classroom finishes awaiting ceiling tiles

New paint and ceiling grid through the corridors

DID YOU KNOW?

Concrete reaches about 90% of its strength in four weeks, but the chemical process absorbing carbon dioxide and converting compounds means foundation walls keep hardening for decades.
