If a student athlete is suspected of sustaining a concussion or head injury in an athletic activity, the student shall be immediately removed from the activity for the remainder of the day. The student shall not be permitted to return to the activity until the student is evaluated by a licensed health care provider trained in the management of concussions and receives the health care provider's written clearance to return to the activity. If the health care provider determines that the student sustained a concussion or a head injury, the student shall also complete a graduated return-to-play protocol of no less than seven days in duration under the supervision of a licensed health care provider. (Education Code 49475)

A middle school or high school football team shall not hold a full-contact practice during the off-season and shall not conduct more than two full-contact practices per week during the preseason and regular season (from 30 days before the commencement of the regular season until the completion of the final interscholastic football game of that season). In addition, the full-contact portion of a practice shall not exceed 90 minutes in any single day. To assist in the prevention of heat illness, coaches and/or athletic trainers shall gradually increase the intensity and duration of exercise to acclimate student athletes to practice in the heat, provide adequate rest breaks, make water available during all athletic activities, and alter practice plans in extreme environmental conditions.

Sudden Cardiac Arrest

The Superintendent or designee shall distribute the California Interscholastic Federation (CIF) information sheet on sudden cardiac arrest to all student athletes who will be participating in a CIF-governed athletic activity and to their parents/guardians. The student and parent/guardian shall sign and return the information sheet prior to the student's participation in the athletic activity. If an athletic activity is not covered by CIF, the student and parent/guardian shall, prior to the student's participation in the athletic activity, sign and return an acknowledgement that they have received and reviewed the sudden cardiac arrest information posted on the California Department of Education's website. If a student athlete passes out or faints, or is known to have passed out or fainted, while participating in or immediately following participation in an athletic activity, the student shall be removed from participation at that time. If a student exhibits any other symptoms of sudden cardiac arrest, including seizures during exercise, unexplained shortness of breath, chest pains, dizziness, racing heart rate, or extreme fatigue, the student may be removed from participation by a coach or other employee who observes these symptoms. If any such symptoms are observed, notification shall be given to the student's parent/guardian so that the parent/guardian can determine the treatment, if any, the student should seek. A student who has been removed from participation shall not be permitted to return until the student is evaluated and given written clearance to return to participation by a health care provider. (Education Code 33479.2, 33479.5)
