

CAREER & TECHNICAL EDUCATION PROGRAM

HVAC

Build career-ready skills in air conditioning, refrigeration, electrical controls, maintenance, and troubleshooting.

Program Description

Provides the student with the essential skills required of an entry-level employee in the air conditioning and refrigeration industry. Training in various aspects of air conditioning and refrigeration includes troubleshooting, maintenance, repair, and servicing of A/C units, related electrical controlling devices, motors, and safety factors concerning the use of various refrigerants. The program curriculum is aligned with the National Center for Construction Education Research standardized national skills standards for the construction trades.
