

CAREER & TECHNICAL EDUCATION PROGRAM

Network Security

Build career-ready skills in cybersecurity, network systems, troubleshooting, and information technology.

Program Description

The Network Security instructional program prepares students to assess the security needs of computer and network systems, recommend safeguard solutions, and manage the implementation and maintenance of security devices, systems, and procedures. Students who successfully complete the Network Security program's coherent sequence of instruction will develop skills to analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure networks operate correctly with minimal interruption.
