

CAREER & TECHNICAL EDUCATION PROGRAM

Organizational Leadership

Develop leadership, communication, decision-making, and workplace management skills for today's organizations.

Program Description

The Organizational Leadership program is designed for students who want to strengthen leadership skills for the workplace. Students explore diversity within organizations and develop a deeper understanding of leadership principles that can be applied in a variety of settings. The program also provides opportunities to build communication, decision-making, and people-management skills for a changing business environment. These skills can support students pursuing entry-level employment, supervisory roles, or future management training opportunities.
