Instructional Technology Plan - 2026-2029 Instructional Technology PlanV. NYSED Initiatives Alignment

Page Last Modified: 01/26/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

Rush-Henrietta Central School District leverages instructional technology as a core strategy to advance instructional excellence, equity, and student-centered learning in alignment with district priorities and academic standards. Technology is intentionally embedded across teaching and learning to support engaging, adaptive learning environments where students access grade-level, culturally responsive instruction and develop critical thinking, problem-solving, and digital fluency skills. Districtwide instructional platforms, digital curriculum resources, and assessment tools enable teachers to design meaningful learning experiences and personalize instruction to meet diverse learner needs.

Educators use instructional technology to facilitate planning, instruction, assessment, and collaboration, with effectiveness measured through walkthrough tools, student growth data, professional learning participation, and ongoing feedback cycles. Students regularly demonstrate their understanding through technology-enabled products such as presentations, portfolios, capstone projects, and collaborative digital workspaces, providing multiple ways to express learning and mastery. The district's 1:1 device program, robust infrastructure, and access to digital tools ensure equitable learning opportunities "everywhere, all the time," including during extended learning and remote instruction when needed.

Rush-Henrietta addresses equity and access through sustained investments in devices, connectivity, instructional software, and staffing to support technology integration and technical operations. Short- and long-term solutions include maintaining reliable network infrastructure, expanding innovative learning spaces, strengthening educator capacity through professional learning, and partnering with regional and community organizations to support future-ready skills. Together, these efforts ensure instructional technology meaningfully improves student performance, supports inclusive and affirming learning environments, and prepares all students for college, career, and citizenship.

2. **At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (Select all that apply)**

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

Yes
