

CAREER & TECHNICAL EDUCATION PROGRAM

Digital Animation

Develop career-ready skills in animation, digital media, visual effects, and production.

Program Description

The Digital Animation instructional program prepares students to use computer applications and related visual and sound imaging techniques to create animations and other visual effects for television, movies, video games, and other media. Students who successfully complete the Digital Animation program's coherent sequence of instruction will develop an in-depth understanding of 2D and 3D image capture, creation, and manipulation; audio and video recording and editing techniques; media management, distribution, and delivery; and specialized equipment operation and maintenance.
