

CAREER & TECHNICAL EDUCATION PROGRAM

Logistics & Supply Chain Management

Build career-ready skills in logistics, transportation, inventory, purchasing, and global supply chain operations.

Program Description

Logistics and Supply Chain Management is one of the fastest-growing and most important fields in today's global economy. This two-year program helps students develop the skills needed to coordinate the movement of goods, services, information, and resources from the point of origin to the end consumer. Students gain experience with purchasing, transportation, inventory, facility planning, logistics processes, imports and exports, and the strategic role these activities play in organizational success. The program prepares students to understand how effective logistics and supply chain management can improve efficiency, reduce costs, and strengthen performance across complex global supply networks.
