

AN INTRODUCTION TO Implementation SCIENCE

Translating Evidence-Based Research into Practice

Designed for teams at any stage of implementation, this training builds the knowledge and habits to ensure system-wide innovations and evidence-based practices are implemented effectively and sustained over time. This training complements the SBCEO Implementation & Improvement Learning Academy series.

- Use practical tools for capacity building in teams and within improvement cycles
- Optimize continuous improvement efforts for socially significant outcomes
- Examine case studies of effective districts
- Explore implementation stages, drivers, and frameworks
- Engage in cross-systems sharing and team-time
