FENTANYL

FACTS

Stanford
MEDICINE

REACH Lab

SAN MATEO
COUNTY
OFFICE OF
EDUCATION

Fentanyl effects can include: **dizziness** and **drowsiness**, **vomiting** and **nausea**, **euphoria**, **pain relief**, and **respiratory failure**

There are 2 types of fentanyl: pharmaceutical and illegally made fentanyl. **Most overdoses are due to illegally made fentanyl**

Carry **naloxone** (Narcan) to stop overdoses of those around you. **Naloxone** cannot be self-administered, so don't do drugs alone.

Majority of **drug overdose deaths** are from illicit fentanyl found in fake pills.

Fentanyl Test Strips

Use test strips to **test drugs** to see if they are **laced with fentanyl**

Fentanyl can be sold in a pill, powder form, or as an injectable; **you can't see, smell or taste it**

PENNY

GRAIN
OF RICE

LETHAL DOSE
OF FENTANYL

A **lethal dose** of fentanyl is equivalent to **less than a grain of rice**

Treatment is available.

Here is a resource to find a treatment center:
