STEM Mission

To inspire curiosity, creativity, and problem-solving through engaging STEM experiences that prepare all students for the future!

Kindergarten

We are learning what the letters in STEM stand for. We know how to think like a scientist and engineer in our problem solving.

First Grade

We are developing a growth mindset in our STEM activities with Squirrels and the Little Green Swing projects.

Second Grade

We understand that STEM is about perseverance in the face of adversity using dominoes. Teamwork is essential for success.

Third Grade

We are using our creative thinking to build our name out of various materials. We then teamed up to build our own school.

Fourth Grade

We kicked off with the Index Card Challenge and Marble Maze team activities. We are learning the importance collecting data.

Fifth Grade

We jumped back into STEM and focused on collaboration with the Stacking Cups and Build the Object lessons. We also made detailed outdoor observations.
