Study Guide

1. The table shows the number of hot dogs Frank's hot dog stand sold this weekend.

Hot Dogs Sold

Friday	3,825
Saturday	1,297
Sunday	4,175

- A. Estimate the number of hot dogs sold by rounding each number in the table to the nearest thousand and finding the sum.

- B. Write and solve an equation to find how many hot dogs were sold.

2. Find $8,000 - 6,280$.

3. Enter the missing digit to complete the subtraction.

$$\begin{array}{r} 10,146 \\ - 6,452 \\ \hline \square 6 \square 4 \end{array}$$

4. Find the difference.

$$\begin{array}{r} 6,572 \\ - 239 \\ \hline \end{array}$$

- (A) 6,811
(B) 6,351
(C) 6,333
(D) 6,331

5.

$$\begin{array}{r} 40,700 \\ - 23,984 \\ \hline \end{array}$$

$$\begin{array}{r} 203,056 \\ - 5,213 \\ \hline \end{array}$$

$$70,000 - 25,228$$

$$560,043 - 312,562$$

6. Find the difference. Then use addition to check your work.

$$\begin{array}{r} 24,421 \\ - 15,029 \\ \hline \end{array}$$

7. Which of the following statements is true? Select all that apply.

- ☐ $12,395 + 14,609 = 27,004$
☐ $76,237 - 4,657 = 42,430$
☐ $67,407 - 38,227 = 29,180$
☐ $69,844 + 1,014 = 70,452$
☐ $34,980 - 1,999 = 32,981$

8. Find the sum.

$$\begin{array}{r} 8,723 \\ 2,849 \\ + 6,419 \\ \hline \end{array}$$

9.

Remember to regroup if necessary when adding whole numbers.

$$\begin{array}{r} 32,834 \\ + 17,384 \\ \hline \end{array}$$

$$\begin{array}{r} 148,382 \\ + 9,243 \\ \hline \end{array}$$

$$215 + 8,823$$

$$42,968 + 44,456$$

10. Joe and Sara recorded the number of birds they saw in the park over two summers.

Birds in the Park

Year	Finches	Pigeons
Last Year	1,219	4,620
This Year	1,906	4,287

- A. Write and solve equations to find how many more total birds Joe and Sara saw this year than last year.

- B. Estimate how many more birds were seen in the park this year than last year by rounding each number in the table and solving the problem. Use the estimate to check if your answer to Part A is reasonable.
