GRADE LEVEL: 2nd Grade COURSE NAME: Math
MEASUREMENT TOPIC: Represent and Solve Problems involving addition and subtraction within 100

4	In addition to Score 3.0, make in-depth inferences and applications. ☐ Analyze a solution to a two-step word problem to justify if it is correct or incorrect.
3	☐ Solve one and two-step addition and subtraction word problems within 100 (with unknowns in all positions) and represent the problem using: ☐ drawings and equations with a symbol for the unknown number to represent the problem ☐ Explain why addition and subtraction strategies work, using place value and properties of operations ☐ Fluently add **and** subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.
2	☐ Subtract within 100 using concrete models and pictorial representations. ☐ Add within 100 using concrete models and pictorial representations.
1	☐ With help, a partial understanding of some of the simpler details and processes, and some of the more complex ideas and processes.

Key Vocabulary: Addition, sum, unknown, subtraction, difference, distance, place value, properties of operations, fluently, drawings, equations, represent, **unknown number, symbol**, compare, decompose, total, part, whole, relationship, tens, ones
