

Madisonville Jr High Carline

Using Covington St., cars will take a left on Renee St. to enter one-way carline. If cars on Renee St. back up to Covington St., cars will be forced to shoulder of road on Covington St. until the line moves (normally Madisonville PD will be directing traffic). Please do not block Jefferson Alley, as our teachers and maintenance use this area to park. Please park about 1 to 2 parking spaces from the corner to allow our buses room to make the curve. Once buses leave, a staff member will begin running carline. In the morning, pull off to lane closet to sidewalk to let students out. Pull up as far as you can. Once student gets out of your car the students will report to their designated area. **In the afternoon, the first car in carline should park where Jefferson Alley meets Renee St. (please do not block Jefferson Alley). This will allow all buses into right lane so the left lane can remain empty.** Once instructed to move, pull into lane closet to sidewalk to pick up your child. Please pull up as far as you can. Your child will have to walk to your car depending on where you end up in carline. Please do not stop if there is room to pull up.

For dances, please follow drop off and pick up times. Follow the protocol above when dropping off and picking up students for dances. On the Highway, Madisonville PD will be in charge of directing traffic. Please follow their directives.
