Name _____

Amazing Animals
Comprehension: Conclusions

Conclusions

Reading Day 2

Read the selection below.

The Venus flytrap is a plant that can catch bugs and eat them. That is bad news for bugs. It is good news for people who do not like bugs eating their gardens.

When a fly gets on the Venus flytrap's leaves, the leaves close and trap the fly inside. It does not take much time for a Venus flytrap to catch a fly.

Complete the map below.
