Name _____

# Sequence of Events

**A Butterfly Grows**
**Comprehension:**
Sequence of Events

**Read the selection below.**

Reading Day 4

Did you ever wonder how bees make honey? Have you ever seen a bee hive? Bees help each other make honey, but it takes many bees to make honey. First, a bee flies to a flower. Flowers have nectar in them. Next, it gets the nectar from the flower. Then, it goes to more flowers to get more nectar. Last, it takes the nectar home to the bee hive.

**Fill in the chart below.**

**First, a bee** _____

↓

**Next, a bee** _____

↓

**Then,** _____

↓

**Last,** _____
