

Look at the Example. Then solve Problems 1-4.

Example

There are 9 stickers.
A class uses some.
Now there are 6.
How many did the class use?

$$\begin{aligned} 9 - ? &= 6 \\ 6 + ? &= 9 \\ 3 \text{ stickers} \end{aligned}$$

- 1 There are 6 stickers.
Daren uses some.
Now there is 1.
How many did Daren use?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

$\underline{\quad}$ stickers

- 2 There are 6 bunnies.
Some hop away.
Now there are 4.
How many hopped away?

_____ ○ _____ = _____

_____ bunnies

- 3 There are 4 bunnies.
Some hop away.
Now there is 1.
How many hopped away?

_____ ○ _____ = _____

_____ bunnies

- 4 Nina has 5 cubes. She gives some away.
Now Nina has 2 cubes.
Find all equations that match. Circle. 

$5 - 3 = 2$

$5 + 2 = 7$

$2 + 3 = 5$
