Qualify the Argument

Take the following 5 statements and qualify them so they are more precise. Then explain why you made the changes that you did. You can keep a quote the same as it is written, just explain why you did so.

Example statement: Failure is always good because it forces people to improve themselves.

Example qualified statement: Failure is often necessary for people to progress and improve because it provides honest feedback that a new approach is needed.

Example explanation: I changed "always" to "often" because failure is not always helpful. In fact, it can overwhelm people at times. However, as a general rule, failure is a great teacher. This is why I changed "always" to "often."

Statement #1: The best way to improve your life is to work harder.

What is Freedom?

Defend, challenge, or qualify the following quotes on freedom. Be sure you write an argumentatitve paragraph for each quote. Your paragraphs should all include a topic sentence/ claim, evidence, and commentary.

Example paragraph:

The idea that "imagination is more important than knowledge" sounds nice, but isn't true. For example, you can have an expansive imagination, but do nothing with it. A person sitting on their couch imagining stories and ideas is pointless if there is no action taken in response to those imaginings. It is through knowledge of the world and the understanding of how things work where ideas come to fruition. For example, your imagination can produce dazzling stories, but without the knowledge of how to present those ideas on paper via writing, or how to produce a film to convey those concepts–you have nothing. In short, imagination is a great thing, but it needs to be used in tandem with knowledge in order to produce anything tangible and valuable.
