MEMORANDUM

TO: All Parents and Students of Phenix City Public Schools
FROM: Mr. Nathan Walters, Superintendent
CC: Mr. Cody Massey, Safety Coordinator
DATE: August 28, 2026
SUBJECT: Notification Regarding Asbestos-Containing Material (Public Law 99-519)

The United States Environmental Protection Agency has established regulations regarding asbestos-containing materials in school buildings. These regulations (Public Law 99-519) require that all schools conduct surveys to identify the presence of asbestos in their buildings and implement appropriate response actions.

These regulations require certain actions to occur in response to any asbestos containing material found in our schools. The Phenix City Board of Education has had an asbestos management program in place for several years.

The Phenix City Board of Education had a re-inspection performed at all of their facilities in compliance with these regulations and an asbestos management plan was developed. The plan describes in detail how any asbestos exposure will be minimized.

Students, parents and teachers and others are invited to review this plan which is available in the principal's or director's office. Should you have any questions or desire further information, please contact me.

Mr. Nathan Walters

Superintendent
