

2025–2026 Internet-Enabled Device Policy Enforcement Report

In accordance with New York State Education Law Section 2803 and West Valley Central School District policy regarding student use of internet-enabled devices, the District reviewed disciplinary actions and documented incidents resulting from student non-compliance with its internet-enabled device policy during the 2025–2026 school year.

West Valley Central School District served 165 students during the 2025–2026 school year.

During the 2025–2026 school year:

- 29 individual students had documented incidents related to non-compliance with the District's internet-enabled device policy.
- The 29 students represented approximately 17.6% of the District's total student enrollment.
- A total of 51 incidents/entries were documented.
- Of the 29 students, 21 were male and 8 were female.
- By grade level:
 - 2 students were in grade 7
 - 2 students were in grade 8
 - 1 student was in grade 9
 - 6 students were in grade 10
 - 5 students were in grade 11
 - 13 students were in grade 12
- Recorded responses to violations included warnings, detention, and extended detention.
- No student received an in- school or out-of-school suspension solely for violating the internet-enabled device policy.

Because of West Valley Central School District's small student population and the relatively small number of individual students receiving disciplinary action, demographic subgroup numbers are too small in many categories to support a reliable determination of statistically significant disparate enforcement.

Based upon the District's review of available 2025–2026 enforcement data, no statistically significant disparate enforcement impact was identified. Therefore, a mitigation action plan is not required at this time.

West Valley Central School District will continue to review internet-enabled device policy enforcement data annually and monitor implementation of the policy to promote consistent, fair, and equitable enforcement for all students.
